Cal. .22L.R.

Operating Instructions

USA

Important instructions for the use of firearms

It should be remembered that even the safest gun is potentially dangerous to you and others when it is not properly handled.

First of all read and understand the operating instructions and learn how the weapon works and is to be handled. Always treat an unloaded weapon as if it were loaded.

Warning: Keep your finger away from the trigger unless you really intend to fire. Always keep your weapon pointing in a safe direction so that you and others cannot be endangered.

Do not use force when disassembling or assembling your weapon. A gun can only be safe as long as it is in a flawless technical condition.

Incorrect handling and lack of maintenance may lead to malfunctions and reduced safety of the weapon.

Always be aware of possible risks from dropping your pistol or from corrosion or other external influences. In such cases, have your weapon inspected by a competent gunsmith before using it again.

Unauthorized modifications to the mechanism, damage caused by the application of force, or modifications performed by third parties will result in the manufacturer
