## **What Have Plants Ever Done For Us Western Civilization In Fifty Plants:**

**What Have Plants Ever Done for Us?** Stephen Harris, 2015 When did the British Government become the world's largest drugs pusher? What tree is frequently used to treat cancer? Which everyday condiment is the most widely traded spice on the planet? Plants are an indispensable part of our everyday life. From the coffee bush and grass for cattle which give us milk for our cappuccinos to the rubber tree which produces tyres for our cars, our lives are inextricably linked to the world of plants. Taking us on a chronological journey, Stephen Harris identifies fifty plants that have been key to the development of the Western world, discussing trade, politics, medicine, travel, and chemistry along the way. Plants have provided paper and ink, chemicals that could kill or cure, vital sustenance and stimulants. Some such as barley have been staples from earliest times, others such as oil palm are newcomers to Western industry. Moreover, with time, uses change: beets which have been used variously as a treatment for leprosy, source of sugar, and animal feed are now showing potential as biofuels. What may the future hold for mandrake or woad? We remain dependent on plants for our food, our fuel, and our medicines. Their effects on our lives, as the stories in this wide-ranging and engaging book demonstrate, continue to be profound and often unpredictable.

*Food and World Culture* Linda S. Watts, Keltie Clark-Mahoney, 2022-08-23 This book uses food as a lens through which to explore important matters of society and culture. In exploring why and how people eat around the globe, the text focuses on issues of health, conflict, struggle, contest, inequality, and power. Whether because of its necessity, pleasure, or ubiquity, the world of food and its lore proves endlessly fascinating to most people. The story of food is a narrative filled with both human striving and human suffering. However, many of today's diners are only dimly aware of the human price exacted for that comforting distance from the lived world, realities of food justice struggles. With attention to food issues ranging from local farming practices to global supply chains, this book examines how food's history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization, such as colonization, conquest, enslavement, and oppression. The main text is structured alphabetically around a set of 70 ingredients, from almonds to yeast. Each ingredient's story is accompanied by recipes. Along with the food profiles, the encyclopedia features sidebars. These are short discussions of topics of interest related to food, including automats, diners, victory gardens, and food at world's fairs. This project also brings a social justice perspective to its content, weighing debates concerning food access, equity, insecurity, and politics.
