International Conflict and Aggressive War Joe Majerus, 2018-07-18 Essay from the year 2017 in the subject Politics General and Theories of International Politics grade 1 7 language English abstract The concept of universal peace cannot exist without the notion of international conflict As with any other diametrically opposed reference systems unipolar multipolar status quo revisionist identity alterity etc it is arguably less the phenomeno hermeneutical study of these two conditions as individual occurrences

than the nexus and antithetical relationship which exists between them which ultimately provides the most interesting avenues for scholarly research into their various subcategories Since the ideal of universal peace is central to this dissertation s underlying historical analysis a thorough engagement with its natural opposite therefore deserves particular attention Two important qualifications however are in order first international war and conflict as here applied shall refer exclusively to wilful and aggressively pursued manifestations thereof and thus not to the use of defensive war measures While the latter designates the legitimate recourse to military force for the purpose of repelling an attack against the territorial integrity political independence or interests of a political entity its aggressive equivalent on the other hand represents the deliberate attempt of one unit to diminish or outright destroy the aforementioned highly prized attributes of another Secondly it is important to remember that although a universal peace specifically implies the system wide preponderance of both negative and positive peace elements its possible termination meanwhile does not necessarily require the occurrence of universal war on a global scale at least not initially For even though the sudden outbreak of total systemic warfare would undoubtedly shatter world peace all by itself its fragile composition might already become endangered by developments involving far less devastating and cataclysmic convulsions History after all is rife with examples where the actual sources of transnational conflict are not just to be found in the eventual military clash of antagonists following a blatant breach of the peace by one of them
