What Is Nature Culture Politics And The Non Human:

What is Nature? Kate Soper, 1995 Reconfiguring Human, Nonhuman and Posthuman in Literature and Culture Sanna Karkulehto, Aino-Kaisa Koistinen, Essi Varis, 2019-07-10 The time has come for human cultures to seriously think to severely conceptualize and to earnestly fabulate about all the nonhuman critters we share our world with and to consider how to strive for more ethical cohabitation *Reconfiguring Human Nonhuman and Posthuman in Literature and Culture* tackles this severe matter within the framework of literary and cultural studies The emphasis of the inquiry is on the various ways actual and fictional nonhumans are reconfigured in contemporary culture although as long as the domain of nonhumanity is carved in the negative space of humanity addressing these issues will inevitably clamor for the reconfiguration of the human as well The Open Access version of this book available at <https://www.taylorfrancis.com/books/reconfiguring-human-nonhuman-posthuman-literature-culture-sanna-karkulehto-aino-kaisa-koistinen-essi-varis-e-10-4324-9780429243042> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Interrogating Boundaries of the Nonhuman Sune Borkfelt, Matthias Stephan, 2022-05-23 *Interrogating Boundaries of the Nonhuman Literature Climate Change and Environmental Crises* asks whether literary works that interrogate and alter the terms of human nonhuman relations can point to new more sustainable ways forward Bringing insights from the field of literary animal studies a diverse and international group of scholars examine literary contributions to the ecological framing of human nonhuman relationships Collectively the contributors to this edited collection contemplate the role of literature in the setting of environmental agendas and in determining humanity's path forward in the company of nonhuman others **Ecopoetics and the Global Landscape** Isabel Sobral Campos, 2018-12-27 *Ecopoetics and the Global Landscape Critical Essays* surveys ecopoetry from a global perspective across different historical epochs Its comparative approach foregrounds the importance of ecopoetics within the context of distinct national literatures and cultures to reveal the ubiquitous intersection of poetry with ecocriticism The collection analyzes environmental problems resulting from the legacies of colonialism and focuses on issues of environmental justice and indigenous issues as well as on the intersection of genocide studies and environmentalism It also examines ecologically informed modes of relating to the world In particular it engages with interactions between the human and nonhuman as well as mind and matter Finally it broadens the scope of place to include both the absent land of exiled peoples and the urban built environment **Routledge International Handbook of Irish Studies** Renée Fox, Mike Cronin, Brian Ó Conchubhair, 2020-12-30 *Routledge International Handbook of Irish Studies* begins with the reversal in Irish fortunes after the 2008 global economic crash The chapters included address not only changes in post Celtic Tiger Ireland but also changes in disciplinary approaches to Irish Studies that the last decade of political economic and cultural unrest have stimulated Since 2008 Irish Studies has been directly and indirectly influenced by the crash and its reverberations through the economy political landscape and social framework of Ireland and beyond *Approaching Irish Pasts Presents* and

futures through interdisciplinary and theoretically capacious lenses the chapters in this volume reflect the myriad ways Irish Studies has responded to the economic precarity in the Republic renewed instability in the North the complex European politics of Brexit global climate and pandemic crises and the intense social change in Ireland catalyzed by all of these Just as Irish society has had to dramatically reconceive its economic and global identity after the crash Irish Studies has had to shift its theoretical modes and its objects of analysis in order to keep pace with these changes and upheavals This book captures the dynamic ways the discipline has evolved since 2008 exploring how the age of austerity and renewal has transformed both Ireland and scholarly approaches to understanding Ireland It will appeal to students and scholars of Irish studies sociology cultural studies history literature economics and political science Chapter 3 5 and 15 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Understanding Cultural Geography Jon Anderson, 2021-04-08 This book outlines how the theoretical ideas empirical foci and methodological techniques of cultural geography make sense of the culture wars that define our time It is on the battleground of culture that our opportunities rights and futures are determined and *Understanding Cultural Geography* showcases how this discipline can be used to understand these battles and how we can engage in them Through doing so the book not only introduces the reader to the rich and complex history of cultural geography but also the key terms on which the discipline is built From these insights the text approaches place as an ongoing composition of traces highlighting the dynamic and ever changing nature of the world around us and what our role can be in transforming it for the better The third edition has been fully revised and updated to incorporate recent literature and reflect the changing cultural context of its time Retaining its exciting and innovative structure the third edition will expand its focus into new areas including updated chapters on ethnicity and race and new chapters on gender and the body This new edition captures not only recent changes in the cultural world but also the discipline itself offering the most up to date text to understand and engage with the cultural battlegrounds which constitute our lives *Understanding Cultural Geography* is the ideal text for students being introduced to the discipline through either undergraduate or postgraduate degree courses The third edition is an important update to a highly successful text that incorporates a vast foundation of knowledge it is an invaluable book for lecturers and students

Governing Nature and the Making of World Order Elana Wilson Rowe, Paul Beaumont, Lucas de Oliveira Paes, 2025-06-24 Available open access digitally under CC BY NC ND licence How have efforts to govern nature and address urgent global environmental challenges shaped transformed or undermined processes of world ordering Chapters in this book explore how efforts to govern nature have transformed or are transforming how we understand and practice world politics Bringing together a team of contributors from around the world the book traces this inquiry across diverse international policy fields from security and peacebuilding through science cooperation and governing ecosystems to the politics of economic growth Taken together the book offers a

conceptually ambitious and empirically grounded account of how the governance of nature and the making of world order intertwine and calls for a research agenda to attend to the growing impact of this interrelationship Shakespeare and the Natural World Tom MacFaul, 2015-11-20 This book explores the rich range of meanings that Shakespeare finds in the natural world enabling new readings of his works *Cultural Studies and Anti-Consumerism* Sam Binkley, Jo Littler, 2014-02-25 Anti consumerism has become a conspicuous part of contemporary activism and popular culture from culture jams and actions against Esso and Starbucks through the downshifting and voluntary simplicity movements the rise of ethical consumption and organic and the high profile of films and books like *Supersize Me* and *No Logo* A rising awareness of labor conditions in overseas plants the environmental impact of intensified consumer lifestyles and the effects of neo liberal privatization have all stimulated such popular cultural opposition However the subject of anti consumerism has received relatively little theoretical attention particularly from cultural studies which is surprising given the discipline's historical investments in extending radical politics and exploring the complexities of consumer desire This book considers how the expanding resources of contemporary cultural theory might be drawn upon to understand anti consumerist identifications and practices how railing against the social and cultural effects of consumerism has a complex past as well as present and it pays attention to the interplays between the different movements of anti consumerism and the particular modes of consumer culture in which they exist In addition as well as using cultural studies to analyse anti consumerism it also asks how such anti consumerist practices and discourse challenges some of the presumptions and positions currently held in cultural studies This book was previously published as a special issue of *Cultural Studies* **Higher Education and the Challenge of Sustainability** Peter Blaze Corcoran, Arjen E.J. Wals, 2007-05-08 Sustainability challenges universities around the world to rethink their missions and to re structure their courses research programs and life on campus Graduates are increasingly exposed to notions of sustainability which are emotionally politically ethically and scientifically charged They must be able to deal with conflicting norms and values uncertain outcomes and futures and a changing knowledge base At the same time they will need to be able to contextualize knowledge in an increasingly globalized society This book provides a variety of valuable theoretical and practical resources for students teachers researchers and administrators who seek to integrate sustainability in higher education Sustainability is not only explored as both an outcome and a process of learning but as a catalyst for educational change and institutional innovation The book raises the various problematics related to this inchoate field and provides an intellectual history and critical assessment of the prospects for institutionalizing sustainability in higher education Routledge Handbook of Gender and Environment Sherilyn MacGregor, 2017-07-14 The Routledge Handbook of Gender and Environment gathers together state of the art theoretical reflections and empirical research from leading researchers and practitioners working in this transdisciplinary and transnational academic field Over the course of the book these contributors provide critical analyses of the gender dimensions of a wide range of timely and challenging topics from

sustainable development and climate change politics to queer ecology and interspecies ethics in the so called Anthropocene Presenting a comprehensive overview of the development of the field from early political critiques of the male domination of women and nature in the 1980s to the sophisticated intersectional and inclusive analyses of the present the volume is divided into four parts Part I Foundations Part II Approaches Part III Politics policy and practice Part IV Futures Comprising chapters written by forty contributors with different perspectives and working in a wide range of research contexts around the world this Handbook will serve as a vital resource for scholars students and practitioners in environmental studies gender studies human geography and the environmental humanities and social sciences more broadly *Museum Politics* Timothy W. Luke,2002 **Culture of the Slow** N. Osbaldiston,2013-04-23 Across the world there has been a growing dissatisfaction with the tempo of modern life Described simply as the slow phenomenon this volume explores this new brand of living that entails not simply slowing down but an embracing of alternative activities that promote meaning thoughtfulness engagement and authenticity Dictionary of Critical Realism Mervyn Hartwig,2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism *Environments in a Changing World* John Huckle,Adrian Martin,2014-09-19 While there is no shortage of of books on the environment there are few introductory texts that outline the social theory that informs human geographical approaches to the interactions between ecology and society Students arriving at university often lack the understanding of history economics politics sociology and philosophy that contemporary human geography requires *Environments in a Changing World* addresses this deficit providing foundation knowledge in a form that is accessible to first year students and applied to the understanding of both contemporary environmental issues and the challenge of sustainability Students are challenged to develop and defend their own ethical and political positions on sustainability and respond to the need for new forms of ecological citizenship Handbook of Ecocriticism and Cultural Ecology Hubert Zapf,2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of

recent literary and cultural studies From its regional origins in late twentieth century Anglo American academia it has become a worldwide phenomenon which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature art and other forms of cultural creativity for the evolution of societies towards sustainable futures In state of the art contributions by leading international scholars in the field this handbook maps some of the most important developments in contemporary ecocritical thought It introduces key theoretical concepts issues and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena

Populations, Biocommunities, Ecosystems George P. Stamou, 2012 Discussions on historical and philosophical issues in ecology have been rather limited This volume presents an enriched and comprehensive review on ecological issues The topics covered in this e book include the emergence of the field of life history st

The Poetics and Politics of the Desert Catrin Gersdorf, 2009-01-01 This study explores the ways in which the desert as topographical space and cultural presence shaped and reshaped concepts and images of America Once a territory outside the geopolitical and cultural borders of the United States the deserts of the West and Southwest have since emerged as canonical American landscapes Drawing on the critical concepts of American studies and on questions and problems raised in recent debates on ecocriticism The Poetics and Politics of the Desert investigates the spatial rhetoric of America as it developed in view of arid landscapes since the mid nineteenth century Gersdorf argues that the integration of the desert into America catered to the entire spectrum of ideological and political responses to the history and culture of the US maintaining that the Americanization of this landscape was and continues to be staged within the idiomatic parameters and in reaction to the discursive authority of four spatial metaphors garden wilderness Orient and heterotopia

Post-Growth Living Kate Soper, 2020-09-29 The reality of runaway climate change is inextricably linked with the mass consumerist capitalist society in which we live And the cult of endless growth and endless consumption of cheap disposable commodities isn't only destroying the world it is damaging ourselves and our way of being How do we stop the impending catastrophe and how can we create a movement capable of confronting it head on In Alternative Prosperity philosopher Kate Soper offers an urgent plea for a new vision of the good life one that is capable of delinking prosperity from endless growth Instead she calls for a renewed emphasis on the joys of being one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time and less conventional and more creative ways of using it but also for more fulfilling ways of working and existing This is an urgent and necessary intervention into debates on climate change

Realism and Racism Bob Carter, 2002-01-04 There are continuing difficulties within social science surrounding concepts of race This book suggests that these difficulties stem from the uncertain ontological and epistemological status of ideas about race itself a

consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors This approach offers a radical revision of orthodox debates about race concepts about the possibility of a social science and about the nature of empirical research This illustrated through two policy examples an account of post war migration to the UK and debates about trans racial adoption in the UK and the USA
