Stalking the Black Swan Kenneth A. Posner, 2010 While many books talk about forecasting and decision making this one is particularly engaging because of Kenneth A Posner s personal experience and the honesty with which he discusses it As a longtime analyst at Morgan Stanley Posner had to make decisions about whether to invest in many recent high profile high stakes Black Swan anomalies He explains general models and approaches to dealing with uncertainty sorting information and developing your analytical skills

and judgment That alone is worthwhile but the book is especially lively when Posner reviews his specific decisions He shares his reasoning and exposes his successes and his failures to public view The result is a knowledge dense but very readable work that getAbstract recommends to all analysts but also to those who want to deal with information overload and improve their decision making
