Foodopoly Wenonah Hauter, 2015-04-07 A meticulously researched tour de force on politics big agriculture and the need to go beyond farmers markets to find fixes Publishers Weekly Wenonah Hauter owns an organic family farm that provides healthy vegetables to hundreds of families as part of the Community Supported Agriculture CSA movement Yet as a leading healthy food advocate Hauter believes that the local food movement is not enough to solve America s food crisis and the public health debacle it has created In Foodopoly she takes aim at the real culprit the control of food production by a handful of large corporations

backed by political clout that prevents farmers from raising healthy crops and limits the choices people can make in the grocery store. Blending history reporting and a deep understanding of farming and food production, Foodopoly is a shocking revealing account of the business behind the meat, vegetables, grains, and milk most Americans eat every day, including some of our favorite and most respected organic and health-conscious brands. Hauser also pulls the curtain back from the little understood but vital realm of agricultural policy, showing how it has been hijacked by lobbyists driving out independent farmers and food processors in favor of the likes of Cargill, Tyson, Kraft, and ConAgra. Foodopoly shows how the impacts ripple far and wide, from economic stagnation in rural communities to famines overseas, and argues that solving this crisis will require a complete structural shift, a change that is about politics, not just personal choice.

The Power of Crisis Ian Bremmer, 2022-05-17 New York Times Bestseller Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years including the pandemic to show how we can respond to three great crises unfolding over the next decade In this revelatory unnerving and ultimately hopeful book Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises global health emergencies transformative climate change and the AI revolution Today Americans

cannot reach consensus on any significant political issue and US and Chinese leaders behave as if they are locked in a new Cold War. We are squandering opportunities to meet the challenges that will soon confront us all. In coming years humanity will face viruses deadlier and more infectious than Covid. Intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives. Most dangerous of all, new technologies will reshape the geopolitical order, disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications. The good news: Some farsighted political leaders, business decision makers, and individual citizens are already collaborating to tackle all these crises. The question that should keep us awake is whether they will work well and quickly enough to limit the fallout and, most importantly, whether we can use these crises to innovate our way toward a better world. Drawing on strategies both time honored and cutting edge, from the Marshall Plan to the Green New Deal, *The Power of Crisis* provides a roadmap for surviving even thriving in the 21st century. Bremmer shows governments, corporations, and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th century globalism promised but failed to deliver.
