Antonio Morata,2021-04-15 The use of non Saccharomyces yeast species is currently a biotechnology trend in enology for which they are being broadly used to improve the sensory profile of wines because they affect aroma color and mouthfeel They have become a powerful biotool to modulate the influence of global warming on grape varieties helping to maintain the acidity decrease the alcoholic degree stabilize wine color and increase freshness In cool climates some non Saccharomyces can promote demalication or color stability by the formation of stable derived pigments Additionally non Saccharomyces yeasts open new possibilities in biocontrol for removing spoilage yeast and bacteria or molds that can produce and release mycotoxins and thereby help in reducing applied SO2 levels **Biology of Microorganisms on Grapes, in Must and in**

Wine Helmut König,Gottfried Uden,Jürgen Fröhlich,2017-11-01 The second edition of the book begins with the description

of the diversity of wine related microorganisms followed by an outline of their primary and energy metabolism. Subsequently, important aspects of the secondary metabolism are dealt with since these activities have an impact on wine quality and off flavour formation. Then chapters about stimulating and inhibitory growth factors follow. This knowledge is helpful for the growth management of different microbial species. The next chapters focus on the application of the consolidated findings of molecular biology and regulation, the functioning of regulatory cellular networks leading to a better understanding of the phenotypic behaviour of the microbes in general and especially of the starter cultures as well as of stimulatory and inhibitory cell-cell interactions during wine making. In the last part of the book, a compilation of modern methods completes the understanding of microbial processes during the conversion of must to wine. This broad range of topics about the biology of the microbes involved in the vinification process could be provided in one book only because of the input of many experts from different wine growing countries.
