The Warhol Economy How Fashion Art And Music Drive New York City:

The Warhol Economy Elizabeth Currid-Halkett, 2007 Which is more important to New York City's economy the gleaming corporate office or the grungy rock club that launches the best new bands If you said office think again In *The Warhol Economy* Elizabeth Currid argues that creative industries like fashion art and music drive the economy of New York as much as if not more than finance real estate and law And these creative industries are fueled by the social life that whirls around the clubs galleries music venues and fashion shows where creative people meet network exchange ideas pass judgments and set the trends that shape popular culture The implications of Currid's argument are far reaching and not just for New York Urban policymakers she suggests have not only seriously underestimated the importance of the cultural economy but they have failed to recognize that it depends on a vibrant creative social scene They haven't understood in other words the social cultural and economic mix that Currid calls the Warhol economy With vivid first person reporting about New York's creative scene Currid takes the reader into the city spaces where the social and economic lives of creativity merge The book has fascinating original interviews with many of New York's important creative figures including fashion designers Zac Posen and Diane von Furstenberg artists Ryan McGinness and Futura and members of the band Clap Your Hands Say Yeah The economics of art and culture in New York and other cities has been greatly misunderstood and underrated *The Warhol Economy* explains how the cultural economy works and why it is vital to all great cities

Globalized

Arts J. P. Singh, 2014-02-01 The spread of Islam around the globe has blurred the connection between a religion a specific society and a territory One third of the world s Muslims now live as members of a minority At the heart of this development is on the one hand the voluntary settlement of Muslims in Western societies and on the other the pervasiveness and influence of Western cultural models and social norms The revival of Islam among Muslim populations in the last twenty years is often wrongly perceived as a backlash against westernization rather than as one of its consequences Neofundamentalism has been gaining ground among a rootless Muslim youth particularly among the second and third generation migrants in the West and this phenomenon is feeding new forms of radicalism ranging from support for Al Qaeda to the outright rejection of integration into Western society In this brilliant exegesis of the movement of Islam beyond traditional borders and its unwitting westernization Olivier Roy argues that Islamic revival or re Islamization results from the efforts of westernized Muslims to assert their identity in a non Muslim context A schism has emerged between mainstream Islamist movements in the Muslim world including Hamas of Palestine and Hezbollah of Lebanon and the uprooted militants who strive to establish an imaginary ummah or Muslim community not embedded in any particular society or territory Roy provides a detailed comparison of these transnational movements whether peaceful like Tablighi Jama at and the Islamic brotherhoods or violent like Al Qaeda He shows how neofundamentalism acknowledges without nostalgia the loss of pristine cultures constructing instead a universal religious identity that transcends the very notion of culture Thus contemporary Islamic fundamentalism is not a single note reaction against westernization but a product and an agent of the complex forces of globalization The Artist-Enterprise in the Digital Age Xavier Greffe, 2016-06-29 This book is a monograph of cultural economics of a new concept artist enterprises It explores various dimensions that artists embody i e aesthetic critical messianic and economic ones and screens the multiple challenges faced by the artist enterprises in terms of pricing funding and networking in the Digital Age It shows how these artist enterprises are at the core of the contemporary creative industries Even when they are on their own artists have to demonstrate or manage a variety of skills sign contracts both in the early and later stages of their activities and also maintain relationships and networks that enable them to attain their artistic and economic goals They are no longer simply entrepreneurs managing their own skills but are the enterprises themselves The artist enterprises thus find themselves at the confluence of two dynamics of production artistic and economic artistic because they invent new expressions and meanings and economic because these expressions must be supported by monetary values on the market The artistic dynamic is part of a long process of artistic enhancement and only an artist can say whether it has reached the point of presentation or equilibrium The economic dynamic is dependent on the constant endorsement of artists works by the market to ensure their survival as artist enterprises The tension created by this disparity is further aggravated by another tension the need to overcome a number of risks so that artist enterprises can progress This book will be of special interest to artists managers students professionals and researchers in the fields of the arts creativity economics and development The

Dávila, 2012-04-16 Culture Works addresses and critiques an important dimension of the work of culture an argument made by enthusiasts of creative economies that culture contributes to the GDP employment social cohesion and other forms of neoliberal development While culture does make important contributions to national and urban economies the incentives and benefits of participating in this economy are not distributed equally due to restructuring that neoliberal policies have wrought from the 1980s on as well as long standing social structures such as racism and classism that breed inequality The cultural economy promises to make life better particularly in cities but not everyone can take advantage of it for decent jobs Exposing and challenging the taken for granted assumptions around questions of space value and mobility that are sustained by neoliberal treatments of culture Culture Works explores some of the hierarchies of cultural workers that these engender as they play out in a variety of settings from shopping malls in Puerto Rico and art galleries in New York to tango tourism in Buenos Aires Noted scholar Arlene Dávila brilliantly reveals how similar dynamics of space value and mobility come to bear in each location inspiring particular cultural politics that have repercussions that are both geographically specific but also ultimately global in scope *Handbook of Local and Regional Development* Andy Pike, Andres Rodriguez-Pose, John Tomaney, 2010-11-17 The Handbook of Local and Regional Development provides a comprehensive statement and reference point for local and regional development The scope of this Handbook's coverage and contributions engages with and reflects upon the politics and policy of how we think about and practise local and regional development encouraging dialogue across the disciplinary barriers between notions of local and regional development in the
