The Voice Of Liberal Learning Michael Oakeshott On Education:

The Voice of Liberal Learning Michael Oakeshott, 2001 To those weary and wary of the cacophony about what's wrong with education in America and what ought to be done about it Oakeshott's voice beckons As usual his approach to the subject is subtle comprehensive and radical in the sense of summoning readers to the root of the matter That root Oakeshott believed is the very nature of learning itself and concomitantly the means as distinct from the method by which the life of learning is discovered cultivated and pursued As Oakeshott has written This then is what we are concerned with adventures in human self understanding Not the bare protestation that a human being is a self conscious reflective intelligence and that he does not live by bread alone but the actual enquiries utterances and actions in which human beings have expressed their understanding of the human condition This is the stuff of what has come to be called a liberal education liberal because it is liberated from the distracting business of satisfying contingent wants Includes a foreword by Timothy Fuller that reiterates the timelessness of Oakeshott's reflections amid the continuing clamour that characterises discourse about liberal education

Educational Theory and Jewish Studies in Conversation Harvey Shapiro, 2013 Educational Theory and Jewish Studies in Conversation From Volozhin to Buczacz by Harvey Shapiro PhD brings together two different fields of study modern Jewish studies and contemporary educational theory to provide new theoretical frameworks for their interaction Although Jewish studies and education programs at secular universities have joined denominational and transdenominational institutions of higher learning in adopting a dual or parallel course structure there has been little scholarly attention given to the basis for doing so Shapiro provides alternative theoretical frameworks for the relationship between Jewish studies and educational theory and discusses different ways of developing and articulating these relationships between disciplines Shapiro shows what is at stake when students and faculty think and communicate together across discourses in particular between the fields of education and Jewish studies Presenting an alternative to conventional notions of interdisciplinarity this book's import extends to virtually all relationships between the humanities and professional education when these different discourses illuminate and challenge one another

Rethinking College Education George Allan, 1997 Not a method of turning your degree back in and having your loans forgiven but an argument that by becoming vocational schools measured by reduced cost and efficient production colleges and universities are neglecting their essential purpose The reason for college education says Allan is to provide an environment within which students can absorb the moral practices that determine how they can acquire and evaluate knowledge best conduct their lives and become responsible adults He maintains that such learning requires imagination dialogue conversation and cultured intercourse

Neoliberalizing the University: Implications for American Democracy Sanford Schram, 2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism s preference for market

based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of *New Political Science*

Fifty Modern Thinkers on Education Joy Palmer, David Edward Cooper, Liora Bresler, 2001 Looks at fifty of the twentieth century's most significant contributors to the debate on education Each essay gives key biographical information an outline of the individual's principal achievements and activities an assessment of his or her impact and influence and a list of their major writings and suggested further reading

The Democratic Theory of Michael Oakeshott Michael Minch, 2009 This book offers a description explanation and evaluation of Michael Oakeshott's democratic theory He was not a democratic theorist as such but as a twentieth century English political theorist for whom liberal theory held deep importance his thought often engaged democratic theory implicitly and many times did so explicitly The author's project penetrates two renewals The first is the revitalization of interest in Oakeshott and the second is the renewal of democratic theory which began in the 1980s In respect to this latter renewal the book engages the deliberative turn in democratic theory These revivals create the context for this new look at Oakeshott To state the matter as a problem one might say that in light of new and fecund democratic theory it is a problem for political theory if one of the most important political theorists of the twentieth century is left out of the discourse insofar as he has something relevant to say about deliberative democracy It is of no small importance that almost all the work in democratic theory being done these days is of the deliberative discursive kind or responses to it That is deliberative theory is driving the agenda of democratic theory The author argues that Oakeshott does indeed have something relevant to say which is applicable to this democratic theory

An Ethical Education Mortimer N. S. Sellers, 1994-11-10 This book considers the ethical basis of fundamental university policies with special emphasis on how issues of community and diversity influence education Students faculty and administrators must seek to maintain a sense of community as diversity increasingly characterises university campuses This raises four central questions which are addressed in this volume What should the aims of universities be given their changed demography How should university curricula reflect multicultural society Does the new environment require special treatment of campus speech What role should affirmative

action play in promoting diversity or community in the academy The shared premise of these essays presented from a variety of perspectives is that university administrators teachers and academic ethicists will all benefit from examining such issues together The contributors approach academic ethics from very diverse institutional roles and ideological positions and this provides a broad and provocative basis for classroom and institutional discussion of the aims of the university the curriculum campus speech and affirmative action These essays will help to give pluralism meaning and establish the common purpose and community of good will that make academic discourse possible
