**Key Themes in Energy Management** Akilu Yunusa-Kaltungo,2024-07-29 This book provides a comprehensive global coverage of energy management as it relates mostly to developing countries In an era of unprecedented global population growth the demand for energy has reached staggering levels The United Nations reported

an enormous 200% increase in population between 1950 and 2020 with projections indicating a further rise to 10.9 billion by 2100. As a direct consequence, global primary energy usage has surged from 3701 Mtoe in 1965 to 13511 Mtoe in 2017, putting immense strain on existing energy sources. If current growth rates persist, these sources could be depleted within a mere 130 years. To address this impending crisis, governments worldwide have implemented regulations and incentives to promote energy conservation. While numerous studies and publications have emerged within the field of energy management, there remains a significant research gap, particularly concerning the energy challenges faced by developing countries. Existing edited books on energy-related topics often narrowly focus on specific aspects, hindering readers from gaining a holistic understanding of energy management challenges and potential solutions. This book fills this void. Recognizing the pivotal role these nations play in achieving sustainable development goals, this book provides a wide-ranging perspective on the trends, challenges, and potential solutions to energy crises in these regions. It not only acknowledges the challenges faced by developing countries but also offers viable strategies to address them. The editor, leveraging his successful leadership experience in global academic endeavors, including publishing a book on Occupational Safety Health practices during the COVID-19 era and coordination of multinational research projects, is well-positioned to bring together exceptional chapters from various countries. His extensive network ensures the inclusion of diverse perspectives, enriching the book's content and offering invaluable insights to readers. Designed for a broad readership, including energy industry organizations, professionals, researchers, government bodies, policymakers, and students, this book delves into a wide array of energy management issues. By facilitating a comprehensive understanding of the subject, it equips readers with the knowledge and tools necessary to navigate the complex landscape of energy management in the modern world.

### **Advances in Computational Intelligence**

Wen Yu, Edgar N. Sanchez, 2009-08-18. This book constitutes the proceedings of the second International Workshop on Advanced Computational Intelligence (IWACI 2009) with a sequel of IWACI 2008 successfully held in Macao, China. IWACI 2009 provided a high-level international forum for scientists, engineers, and educators to present state-of-the-art research in computational intelligence and related fields. Over the past decades, the computational intelligence community has witnessed tremendous efforts and developments in all aspects of theoretical foundations, architectures, and network organizations, modelling, and simulation, empirical study, as well as a wide range of applications across different domains. IWACI 2009 provided a great platform for the community to share their latest research results, discuss critical future research directions, stimulate innovative research ideas, as well as facilitate international multidisciplinary collaborations. IWACI 2009 received 146 submissions from about 373 authors in 26 countries and regions: Australia, Brazil, Canada, China, Chile, Hong Kong, India, Islamic Republic of Iran, Japan, Jordan, Macao, Malaysia, Mexico, Pakistan, Philippines, Qatar, Republic of Korea, Singapore, South Africa, Sri Lanka, Spain, Taiwan, Thailand, UK, USA, Venezuela, Vietnam, and Yemen, across six continents: Asia, Europe, North America, South America, Africa, and Oceania. Based on the rigorous peer reviews by the Program Committee members, 52 high

quality papers were selected for publication in this book with an acceptance rate of 36.3%. These papers cover major topics of the theoretical research, empirical study and applications of computational intelligence. **Psychological Assessment in**

**South Africa** Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners. *A scholarly contribution to educational*

*praxis* M.A. Mokoena, J.M. (Ona) Janse van Rensburg, M. Erasmus, E. Mentz, C.B. Zulu, A. Cronje, E.K. Materechera, W.T. Dudu, A.T. Kanyimba, S.P. Raath, C. Kruger, A. Loubser, A.E. Pienaar, A. Kloppe, S. Ellis, N.T. Petersen, J. de Beer, J. Varughese, A. Seugnet Blignaut, C. Els, 2016-12-31 This publication contains original research targeting scientific specialists in the field of education through research endeavours grounded on a philosophical basis as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive Dean Faculty of Education and Training Professor Akpovire Oduaran made the following remarks: 'To a large extent the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment. So then what the reader is offered in this volume is the articulation of ideas that have been interrogated, structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World. Yet what makes this book so welcome, relevant and timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature.' **Remembering the Holocaust in a Racial State** Roni Mikel-Arieli, 2022-07-18 The lens of apartheid era Jewish commemorations of the Holocaust in South Africa reveals the fascinating transformation of a diasporic community.

Through the prism of Holocaust memory, this book examines South African Jewry and its ambivalent position as a minority within the privileged white minority. Grounded in research in over a dozen archives, the book provides a rich empirical account of the centrality of Holocaust memorialization to the community's ongoing struggle against global and local

antisemitism Most of the chapters focus on white perceptions of the Holocaust and reveals the tensions between the white communities in the country regarding the place of collective memories of suffering in the public arena However the book also moves beyond an insular focus on the South African Jewish community and in very different modality investigates prominent figures in the anti apartheid struggle and the role of Holocaust memory in their fascinating journeys towards freedom

**Locating Social Justice in Higher Education Research** Jan McArthur,Paul Ashwin,2020-03-19 This book focuses on the relations between social justice and higher education research Jan McArthur and Paul Ashwin bring together chapters from international researchers that explore these relations in a range of national contexts and consider their implications for policies pedagogy and our understanding of the roles of graduates in societies As a whole the book argues that social justice needs to be more than a topic of higher education research and must also be part of the way that research is undertaken Social justice must be located in research practices as well as in the issues that are researched *Transformative*

*Innovation for Sustainable Human Settlements* Andrew Emmanuel Okem,Sithembiso Lindelihle Myeni,Tshepang Mosiea,2024-11-18 This book uses the transformative innovation policy TIP as a lens to show how innovative processes practices and systems could address critical challenges and facilitate the delivery of sustainable human settlements in South Africa The TIP approach shows that addressing societal problems is not a function of a technical solution within a government department but one that requires partnership with multiple stakeholders The book argues that it is essential to understand and embrace innovation policy that is transformative and responds to the social and environmental needs at local provincial and national levels It demonstrates that innovation policy should focus on transforming the socio technical systems that demand embracing notions such as experimental delivery and learning directionality and inclusivity Chapters explore the ability of the state to transform its organisational processes and capacity to improve and align its planning implementation monitoring and evaluation systems to high levels of efficiency and sustainability targets Bringing together various theoretical and empirical perspectives on innovation in the context of sustainable human settlement this book will be of interest to scholars and students in the fields of Housing Human Settlements Architecture Public Policy Development Studies Civil Engineering Political Science and Public Administration **Research Ethics and Social Movements** Kevin

Gillan,Jenny Pickerill,2016-04-14 What ethical challenges are faced by researchers studying social and political movements Should scholars integrate their personal politics and identities into their research What role should activists have in shaping the purposes or processes of social scientific research How do changing political contexts affect the ethical integrity of a research project over time These are some of the live issues of research ethics that face students and scholars whose research subjects are located in contentious political terrain The contributors to this volume expose their own ethical thinking as they have met such challenges head on Each explores real dilemmas of ethical practice on the ground as they carry out research on social movements across the globe Authors examining pro democracy activists in Malaysia sanctions

breakers in the Gaza Freedom Flotilla environmental health organisations in North America and much else find that the narrow confines of Research Ethics Committees and Institutional Review Boards offer little guidance on the questions that really matter They offer instead a demonstration of continual reflexivity that is both personal and political in its approach This book opens up debate on research ethics delineating key challenges and offering hopeful and practical ways forward for real world ethical social science This book was published as a special issue of *Social Movement Studies* Geobulletin Geological Society of South Africa, 2006 Quarterly news bulletin Kwartaallikse nuusbuletin *Mobile Commerce Applications* Nansi Shi, 2004-01-01 *Mobile Commerce Applications* addresses and explores the critical architectural issues in constructing m commerce applications and in applying mobile technologies in different areas including methodologies enabling technologies models paradigms architectures standards and innovations Extracting the Science Jürgen F. Brune, 2010 These research papers also cover a spectrum of innovative technical solutions including computer controlled mining equipment remote monitoring of air quality and virtual reality training systems **Signergy** C. Jac Conradie, Ronél Juhl, Marthinus Beukes, Olga Fischer, Christina Ljungberg, 2010-05-26 The title of this volume strives to capture the dynamic scope and range of the essays it contains applying insights into the workings of iconicity to texts as far removed from each other in time as the Medieval tale of a bishop fish and the war poems of 20th century Italian Futurist F T Marinetti and as thematically diverse as the Pilgrim's Progress and the poetry of e e cummings Applications reference both language and linguistics as well as literature and literary theory and related fields such as sign language and translation the former approached from the point of view of Japan Sign Language the latter with reference to translations of the Koran and the Sesotho Bible as well as modern German and English Bible translations On the language side the intricate relationships between sound symbolism and etymology and between analogy and grammaticalization are examined in depth On the literary side the iconic effects of techniques such as enjambment and metrical inversion are considered but also the ways in which an understanding of iconicity can open up meanings in complex poetry like that of the Afrikaans poet T T Cloete in this particular instance three poems inspired by figures as diverse as Dante Paul Klee and the pop icon Marilyn Monroe In view of the fact that form is able to mime meaning and meaning itself can be mimed by meaning the theoretical question is asked on the basis of a wide range of examples from literature language music and other sign systems whether meaning can also mime form An introduction to the work of H C T Miller an early scholar in the field of iconicity highlights a regrettably little known South African contribution to the development of iconicity theory **Proceedings of the International Conference on Education Research** Reza Hosseini, **Photography in and out of Africa** Kylie Thomas, Louise Green, 2018-02-02 This book offers a range of perspectives on photography in Africa bringing research on South African photography into conversation with work from several other places on the continent including Angola the DRC Kenya Mali Morocco Nigeria Ethiopia and Eritrea The collection engages with the history of photography and its role in colonial regulatory regimes with

social documentary photography and practices of self representation and with the place of portraits in the production of subjectivities as well as contemporary and experimental photographic practices Through detailed analyses of particular photographs and photographic archives the chapters in this book trace how photographs have been used both to affirm colonial worldviews and to disrupt and critique such forms of power This book was originally published as a special issue of Social Dynamics

**On Information Structure, Meaning and Form** Kerstin Schwabe, Susanne Winkler, 2007-03-08 This collection of articles offers a new and compelling perspective on the interface connecting syntax phonology semantics and pragmatics At the core of this volume is the hypothesis that information structure represents the common interface of these grammatical components Information structure is investigated here from different theoretical viewpoints yielding typologically relevant information and structural generalizations In the volume s introductory chapter the editors identify two central approaches to information structure the formal and the interpretive view The remainder of the book is organized accordingly The first part examines information structure and grammar concentrating on generalizations across languages The second part investigates information structure and pragmatics concentrating on clause structure and context Through concrete analyses of topic focus and related phenomena across different languages the contributors add new and convincing evidence to the research on information structure

*Border Jumping and Migration Control in Southern Africa* Francis Musoni, 2020-04-07 With the end of apartheid rule in South Africa and the ongoing economic crisis in Zimbabwe the border between these Southern African countries has become one of the busiest inland ports of entry in the world As border crossers wait for clearance crime violence and illegal entries have become rampant Francis Musoni observes that border jumping has become a way of life for many of those who live on both sides of the Limpopo River and he explores the reasons for this including searches for better paying jobs and access to food and clothing at affordable prices Musoni sets these actions into a framework of illegality He considers how countries have failed to secure their borders why passports are denied to travelers and how border jumping has become a phenomenon with a long history especially in Africa Musoni emphasizes cross border travelers active participation in the making of this history and how clandestine mobility has presented opportunity and creative possibilities for those who are willing to take the risk
