**Celebrity Humanitarianism and North-South Relations** Lisa Ann Richey, 2015-08-20 Discussion over celebrity engagement is often limited to theoretical critique or normative name calling without much grounded research into what it is that celebrities are doing the

same or differently throughout the world Crucially little attention has been paid to the Global South either as a place where celebrities intervene into existing politics and social processes or as the generator of Southern celebrities engaged in do gooding This book examines what the diverse roster of celebrity humanitarians are actually doing in and across North and South contexts Celebrity humanitarianism is an effective lens for viewing the multiple and diverse relationships that constitute the links between North and South New empirical findings on celebrity humanitarianism on the ground in Thailand Malawi Bangladesh South Africa China Haiti Congo US Denmark and Australia illustrate the impact of celebrity humanitarianism in the Global South and celebritization participation and democratization in the donor North By investigating one of the most mediatized and distant representations of humanitarianism the celebrity intervention from a perspective of contextualization the book underscores the importance of context in international development This book will be of interest to students and researchers in the fields of development studies celebrity studies anthropology political science geography and related disciplines It is also of great relevance to development practitioners humanitarian NGOs and professionals in business CSR fair trade who work in the increasingly celebritized field

*Extreme and Systemic Risk Analysis* Stefan Hochrainer-Stigler, 2020-04-06 This book is about how extreme and systemic risk can be analyzed in an integrated way Risk analysis is understood to include measurement assessment as well as management aspects Integration is understood as being able to perform risk analysis for extreme and systemic events simultaneously The presented approach is based on Sklar's theorem which states that a multivariate distribution can be separated into two parts one describing the marginal distributions and the other describing the dependency between the distributions using a so called copula It is suggested to reinterpret Sklar's theorem from a system or network perspective treating copulas as a network property and individual including extreme risk as elements within the network In that way extreme and systemic risk can be analyzed independently as well as jointly across several scales The book is intended for a large audience and all techniques presented are guided with examples and applications with a special focus on natural disaster events Furthermore an extensive literature and discussion of it are given in each chapter for the interested reader

*Water ecosystem services* Martin-Ortega, Julia, Ferrier, Robert C., Gordon, Iain J., Khan, Shahbaz, Cambridge, UK, Cambridge University Press, 2015-04-30 This comprehensive volume describes how ecosystem services based approaches can assist in addressing major global and regional water challenges such as climate change biodiversity loss and water security in the developing world by integrating scientific knowledge from different disciplines such as hydrological modelling environmental economics psychology and international law Empirical assessments at the national catchment and regional levels are used to critically appraise this systemic approach and the merits and potential limitations are presented The practicalities of this approach with regard to water resources management nature conservation and sustainable business practices are discussed and the role of society in underpinning the concept of ecosystem services is explored Presenting new insights and perspectives on
