

UNREASONABLE DOUBT: MANIPULATING JURORS' PERCEPTIONS IN A CLOSING ARGUMENT AT TRIAL

Pamela Hobbs

ABSTRACT

This paper seeks to explain the jury's verdict of acquittal in the bizarre case of eccentric millionaire Robert Durst, who was charged with the murder of Morris Black after Black's body parts were found floating in Galveston Bay off the coast of Texas. Though an analysis of a portion of the defense' closing argument, this paper examines the Durst defense team's strategy of directing the jury's attention to a single event – the confrontation that resulted in Black's death – in order to effect a shift in focus that allowed them to use "reasonable doubt" to leverage their argument that the prosecution had not met its burden of proof. This paper demonstrates how this strategy acted to construct the "unreasonable doubt" that resulted in the jury's verdict.

INTRODUCTION

The jury is a unique feature of the Anglo-American legal system, and its longevity and continuing popularity are indicative of Americans' overriding faith

Unreasonable Doubt Unreasonable Doubt:

Unreasonable Doubt Norma Thompson, 2011 Part detective story part social commentary part intellectual autobiography part philosophical analysis this is a jury book unlike any other Anthony Kronman Sterling Professor of Law and former Dean Yale Law School Norma Thompson teaches us brilliantly and painlessly why judging as opposed to simply knowing is an essential part of a responsible human existence recounting the trials and crimes and moral dilemmas of antiquity and classical tradition in a stunningly original reading Abraham D Sofaer Senior Fellow Hoover Institution and former United States District Judge In 2001 Norma Thompson served on the jury in a murder trial in New Haven Connecticut In *Unreasonable Doubt* Thompson dramatically depicts the jury's deliberations which ended in a deadlock As foreperson she pondered the behavior of some of her fellow jurors that led to the trial's termination in a hung jury Blending personal memoir social analysis and literary criticism she addresses the evasion of judgment she witnessed during deliberations and relates that evasion to contemporary political social and legal affairs She then assembles an imaginary jury of Tocqueville Plato and Jane Austen among others to show how the writings of these authors can help model responsible habits of deliberation

Unreasonable Doubts Reyna Marder Gentin, 2025-07-30 Jaded New York City Public Defender Liana Cohen would give anything to have one client in whom she can believe Dozens of hardened criminals and repeat offenders have chipped away at her faith in both herself and the system Her boyfriend Jakob's high powered law firm colleagues see her do a gooder job as a joke which only adds to the increasing strain in their relationship Enter imprisoned felon Danny Shea whose unforgivable crime would raise a moral conflict in an attorney at the height of her idealism and that hasn't been Liana in quite a while But Danny's astonishing blend of good looks intelligence and vulnerability intrigues Liana Could he be the client she's been longing for the wrongly accused in need of a second chance Is he innocent As their attorney-client relationship transforms into something less than arm's length Liana is forced to confront fundamental questions of truth faith and love and to decide who she wants to be

Unreasonable Doubt Essam M. Al Mohandis, 2014-11-17 What urged me to jot down what I had written in this little novel are the lessons that I have learned from the grand Lifes University I had benefited from the experiences that I learned Some specific points are clearly pointed and i am sure you would be able to grasp what is between the lines Yes I had learned felt seen and believed that the person who is conscious of Allah the Almighty He would make him a way out and provide him with means from sources he would think the least he would be able to get from Allah the Almighty granted me strength after weakness He granted me security after being frightened He granted me provisions after being poor Allah the Almighty employed for me those who knew me and those who dont know me I kept on calling and invoking upon the King of all kings Lord I raised my hand up to Him He didnt return them empty out of His generosity and kindness Some of the most beautiful moments are those which man spends with his own thoughts and memories that he lives second by second as he feels their sweetness bitterness hopes pains pleasures and sorrows and all their details As I jot down what I

could of such moments and capture them by words and phrases I beg your pardon and ask your forgiveness I don't mean to excite you and stir your emotions through a novelist writing but rather I would like to give an honest account of my own story that carries my own emotions and feelings I seek your permission to sail with me in order to narrate to you and in order to see with your own eyes the events of two months of suffering and pains that I spent in the USA in the state of Massachusetts in the city of Boston

Out of My Mind WJ de Kock, 2014-03-25 We need a whole new mind to thrive in the twenty first century says Daniel Pink As theologians we cannot escape the transition from the information age to the conceptual age of the twenty first century In the information age the theologian could give answers based on the best information but in the twenty first century information is on hand Empathy and understanding however are in scant supply today In the information age there was no room for doubt certainty was the hallmark of a successful information worker But today uncertainty is a certainty thanks to globalization the information revolution and even quantum mechanics Uncertainty has been grafted into our collective consciousness It therefore cannot be theological business as usual It cannot be about giving answers it is more about finding the best questions to be answered It cannot be about winning theological arguments it is more about living in God's regenerative story while we find ourselves in the liminal space of uncertainty It cannot be about holding strong opinions it is more about creating space for life to allow God's generosity to flow through us *Out of My Mind* tells the story of such a transition

Personal Reality, Volume 1 Daniel Paksi, 2020-05-28 Western civilization was

built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his her body We use our billions of years old evolutionary skills and thousands of years old cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our thinking God or matter There is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies **New York Court of Appeals. Personal Knowledge Michael Polanyi, 2015-06-22 An expanded edition of the classic philosophical work that enquires into the nature and justification of scientific knowledge The publication of *Personal Knowledge* in 1958 shook the science world as Michael Polanyi took aim at the long standing ideals of rigid empiricism and rule bound logic Today *Personal Knowledge* remains one of the most significant philosophy of science books of the twentieth century bringing the crucial concepts of tacit knowledge and personal knowledge to the forefront of inquiry In this remarkable treatise Polanyi attests that our personal experiences and ways of sharing knowledge have a profound effect on scientific discovery He argues against the idea of the wholly dispassionate researcher pointing out that even in the strictest of sciences knowing is still an art and that personal commitment and passion are logically necessary parts of research In our technological age where fact is split from value and science from humanity Polanyi's work continues to advocate for the innate curiosity and scientific leaps of faith that drive our most dazzling ingenuity For this expanded edition Polanyi scholar Mary Jo Nye set the philosopher scientist's work into contemporary context offering fresh insights and providing a helpful guide to critical terms in the work Used in fields as diverse as religious studies chemistry economics and anthropology Polanyi's view of knowledge creation is just as relevant to intellectual endeavors today as when it first made waves more than fifty years ago Praise for *Personal Knowledge* Polanyi's monumental work takes the shape of an orderly rejection of the false ideal of wholly explicit and wholly impersonal so called objective knowledge The human mind for him is not an impersonal machine engaged in the manufacture of truth In fact *Personal Knowledge* represents a compelling critique of the positivist claim for total objectivity in scientific knowledge Polanyi the scientist philosopher calls forth an enormous array of examples to show that the scientist himself is engaged in acts of personal acceptance and judgment in the very doing of science Philosophy Today Rich in insights groundbreaking in its interpretations *Personal Knowledge* deserves to be better known Science and Education **Hot Thought** Paul Thagard, 2008 A description of mental mechanisms that explain how emotions influence thought from everyday decision making to scientific discovery and religious belief and an analysis of when emotion can contribute to good reasoning
