Up Against It Tor Science Fiction:

Up Against It Laura J. Mixon, 2011-03-15 Geoff and his friends live in Phocaea a distant asteroid colony on the Solar System's frontier. They're your basic high spirited young adults enjoying such pastimes as hacking matter compilers to produce dancing skeletons that prance through the low gee communal areas using their rocket bikes to salvage methane ice shrapnel that flies away when the colony brings in a big and vital rock of the stuff and figuring out how to avoid the ubiquitous surveillance motes that are the million eyes of Stroiders a reality TV show whose Earthside producers have paid handsomely for the privilege of spying on every detail of the Phocaeans' lives. Life isn't as good as it seems though. A mysterious act of sabotage kills Geoff's brother Carl and puts the entire colony at risk. And in short order we discover that the whole thing may have been cooked up by the Martian mafia as a means of executing a coup and turning Phocaea into a client state. As if that wasn't bad enough there's a rogue AI that was spawned during the industrial emergency and slipped through the distracted safeguards and a giant x factor in the form of the Viridians a transhumanist cult that lives in Phocaea's bowels. In addition to Geoff our story revolves around Jane the colony's resource manager a bureaucrat engineer in charge of keeping the plumbing running on an artificial island of humanity poised on the knife edge of hard vacuum and unforgiving space. She's more than a century old and good at her job but she is torn between the technical demands of the colony and the political realities of her situation in which the fishbowl effect of Stroiders is compounded by a reputation economy that turns every person into a beauty contest competitor. Her manoeuvrings to keep politics and engineering in harmony are the heart of the book. At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied.

Arab and Muslim Science Fiction Hosam A. Ibrahim Elzembely, Emad El-Din Aysha, 2022-05-06 How is science fiction from the Arab and Muslim world different than mainstream science fiction from the West? What distinctive and original contributions can it make? Why is it so often neglected in critical considerations of the genre? While other books have explored these questions, all have been from foreign academic voices. Instead, this book examines the nature, genesis and history of Arabic and Muslim science fiction, as well as the challenges faced by its authors in their own words. These authors share their stories and struggles with censors, recalcitrant publishers, critics, the book market and the literary establishment. Their uphill efforts with critical contributions from academics, translators and literary activists will enlighten the sci-fi enthusiast and fill a gap in the history of science fiction. Topics covered range from culture shock to conflicts between tradition and modernity, proactive roles for female heroines, blind imitation of storytelling techniques and language games.
