Field Manual FM 3-06 Urban Operations October 2006 U. S. Army United States Government, Us Army, 2012-05-21

Doctrine provides a military organization with a common philosophy a language a purpose and unity of effort Rather than establishing a set of hard and fast rules the objective of doctrine is to foster initiative and creative thinking To this end FM 3 06 discusses major Army operations in an urban environment This environment consisting of complex terrain a concentrated population and an infrastructure of systems is an operational environment in which Army forces will operate In the future it may be the predominant operational environment Each urban operation is unique and will differ because of the multitude of combinations presented by the threat the urban area itself the major operation of which it may be part or the focus and the fluidity of societal and geopolitical considerations Therefore there will always exist an innate tension between Army doctrine the actual context of the urban operation and future realities Commanders must strike the proper balance between maintaining the capability to respond to current threats and preparing for future challenges

PURPOSE This manual provides the analytical tools for evaluating an urban operation to determine if the operation is necessary for overall mission success It also provides the means to understanding and determining the impacts of the urban environment on military operations and provides information on managing taking advantage of and mitigating the effects of those impacts as appropriate As such this manual demonstrates how to apply the doctrinal principles in FM 3 0 to this unique environment

SCOPE Chapter 1 introduces theoretical and historical perspectives of urban operations that serve as the underlying basis for the rest of the manual While this manual has incorporated lessons learned from recent and ongoing operations it has deliberately taken a broad and varied historical perspective in order to remain relevant to future threats and circumstance differing from those that the Army currently faces Chapter 2 discusses the characteristics of urban centers and populations as well as their impact on operations It is unlikely that Army forces will ever operate in a benign urban environment therefore Chapter 3 discusses the varied nature of potential urban threats Chapter 4 describes the effects of the urban environment on warfighting functions and tactics An understanding of the complexities of the urban environment the nature of the enemy as an adaptive learning opponent and the effects of the environment on warfighting capabilities and skills is essential to sound decision making Chapters 5 and 6 discuss the potential costs of urban operations and risk reduction measures that the commander and his staff must consider early in their planning These chapters also outline an urban operational framework and specific urban considerations that create the foundations necessary for successfully applying operational doctrine to an urban environment The second part of the manual Chapters 7 10 discusses how urban operations are conducted and resourced Urban operations include major offensive and defensive operations in urban environments as well as stability or civil support operations ranging from peace operations and counterterrorism to disaster relief and humanitarian assistance For the different types of operations offense defense and stability or civil support the purpose characteristics organization and considerations are

discussed However commanders consider that most urban operations will normally involve the simultaneous execution of offense and defense with stability or civil support although proportional emphasis will shift over time and plan accordingly

The Long War - Insurgency, Counterinsurgency and Collapsing States Mark T. Berger, Douglas A. Borer, 2013-09-13 The rise and fall of the Cold War coincided with the universalization and consolidation of the modern nation state as the key unit of the wider international system A key characteristic of the post Cold War era in which the US has emerged as the sole superpower is the growing number of collapsing or collapsed states A growing number of states are or have become mired in conflict or civil war the antecedents of which are often to be found in the late colonial and Cold War era At the same time US foreign policy and the actions of other organizations such as the United Nations may well be compounding state failure in the context of the post 9 11 Global War on Terror GWOT or what is also increasingly referred to as the Long War The Long War is often represented as a new era in warfare and geopolitics This book acknowledges that the Long War is new in important respects but it also emphasizes that the Long War bears many similarities to the Cold War A key similarity is the way in which insurgency and counterinsurgency were and continue to be seen primarily in the context of inter state rivalry in which the critical local or regional dynamics of revolution and counter revolution are marginalized or neglected In this context American policy makers and their allies have again erroneously applied a grand strategy that suits the imperatives of conventional military and geo political thinking rather than engaging with what are a much more variegated array of problems facing the changing global order This book provides a collection of well integrated studies that shed light on the

history and future of insurgency counterinsurgency and collapsing states in the context of the Long War This book was previously published as a special issue of Third World Quarterly
