Lambert,2014-05-14 From one of our foremost naval historians the compelling story of the doomed Arctic voyage of the HMS Erebus and the HMS Terror commanded by Captain Sir John Franklin Andrew Lambert a leading authority on naval history reexamines the life of Sir John Franklin and his final doomed Arctic voyage Franklin was a man of his time fascinated even obsessed with the need to explore the world he had already mapped nearly two thirds of the northern coastline of North America when he undertook his third Arctic voyage in 1845 at the age of fifty nine His two ships were fitted with the latest equipment steam engines enabled them to navigate the pack ice and he and his crew had a three year supply of preserved and tinned food and more than one thousand books Despite these preparations the voyage ended in catastrophe the ships became imprisoned in the ice and the men were wracked by disease and ultimately wiped out by hypothermia scurvy and cannibalism Franklin s mission was ostensibly to find the elusive North West Passage a viable sea route between Europe and Asia reputed to lie north of the American continent Lambert shows for the first time that there were other scientific goals for the voyage and that the disaster can only be understood by reconsidering the original objectives of the mission Franklin commonly dismissed as a bumbling fool emerges as a more important and impressive figure in fact a hero of navigational science **Implication** Alan C. Braddock,2023-05-16 Readers of Implication will come away convinced that all art regardless of historical period context genre or medium has an ecological connection to the world in which it was created Ecocriticism is an interdisciplinary mode of inquiry that examines the environmental significance of art literature and other creative endeavors In Implication An Ecocritical Dictionary for Art History Alan C Braddock a pioneer in art historical ecocriticism presents a fascinating group of key terms and case studies to demonstrate that all art is ecological in its interconnectedness with the world The book adopts a dictionary style format although not in a conventional sense Drawing inspiration from French surrealist writer Georges Bataille this dictionary presents carefully selected words that link art history to the environmental humanities not only ecocriticism but also environmental history science politics and critical animal studies A wide array of creative works from different cultures and time periods reveal the import of these terms and the inescapable entanglement of art with ecology Ancient Roman mosaics Song dynasty Taihu rocks a Tlaxcalan lienzo early modern European engravings and altarpieces a Kongo dibondo nineteenth century landscape paintings by African American artist Edward Mitchell Bannister French Impressionist urban scenes and contemporary activist art among other works here disclose the intrinsic ecological conditions of art **Indecent Exposures** Sarah Gordon,2015-10-27 Photographer Eadweard Muybridge 1830 1904 often termed the father of the motion picture presented his iconic Animal Locomotion series in 1887 Produced under the auspices of the

Liquid Crystals Esther Leslie,2016-11-15 While it is responsible for today s abundance of flat screens on televisions computers and mobile devices most of us have only heard of it in the ubiquitous acronym LCD with little thought as to exactly what it is liquid crystal In this book Esther Leslie enlightens us offering an accessible and fascinating look at not a substance not a technology but a wholly different phase of matter As she explains liquid crystal is a curious material phase that organizes a substance s molecules in a crystalline form yet allows them to move fluidly like water Observed since the nineteenth century this phase has been a deep curiosity to science and in more recent times the key to a new era of media technology In between that time as Leslie shows it has figured in cultural forms from Romantic landscape painting to snow globes from mountaineering to eco disasters and from touchscreen devices to DNA Expertly written but accessible *Liquid Crystals* recounts the unheralded but hugely significant emergence of this unique form of matter

The Dream of the North Peter Fjagesund,2014-05-10 Northern Europe and North America have dominated the world stage for more than two centuries Using a wide range of sources this book provides the first coherent account from a multi national perspective of the ideas and perceptions that from the Renaissance onwards fuelled the North s rise to prominence and enabled it to rival the traditional cultural and political hegemony of the South This includes not only the fascinating conquest of the polar regions but also the religious upheaval of the Reformation the changing view of nature engendered by Romanticism and not least the revival of ancient Nordic and Celtic culture Finally the book offers an indispensable historical background to current events in the Far North where the past and the future meet in a complex web of dramatic environmental concerns the exploitation of natural resources and the strategies of politics and commerce
