Traditional Peoples and Biodiversity Conservation in Large Tropical Landscapes Kent Hubbard Redford, Jane A. Mansour, 1996 *Traditional Peoples and Biodiversity Conservation in Large Tropical Landscapes* Kent Hubbard Redford, Jane A. Mansour, 1996 **Conservation and Mobile Indigenous Peoples** Dawn Chatty, Marcus Colchester, 2002 Includes statistics *Biodiversity and Native America* Paul E. Minnis, Wayne J. Elisens, 2001-08-01 Exploring the relationship between Native Americans and the natural world Biodiversity and Native America questions the widespread view that indigenous peoples had minimal ecological impact in North America Introducing a variety of perspectives ethnopharmacological ethnographic archaeological and biological this volume shows that Native Americans were active managers of natural ecological systems The book covers groups from the sophisticated agriculturalists of the Mississippi River drainage region to the low density hunter gatherers of arid western North America This book allows readers to develop accurate restoration management and conservation models through a thorough knowledge of native peoples ecological history and dynamics It also illustrates how indigenous peoples affected environmental patterns and processes improving crop diversity and agricultural patterns **Latin America & the Caribbean** Kevin Hillstrom, Laurie Collier Hillstrom, 2003-12-02 A concise yet thorough overview of the environmental issues problems and controversies facing Latin America and the Caribbean from the tip of South America to the Windward Islands Home to Earth's longest mountain range largest river and greatest rainforest no region boasts greater geographic extremes faces greater environmental dangers and enjoys more economic potential from its biodiversity than Latin America and the Caribbean What are the political and economic factors affecting the Amazon's rapidly disappearing rainforest What is being done to harvest life saving drugs from the plants of the Orinoco And what lies behind the mysterious disappearance of Central America's frogs The work includes essays tables and figures and an appendix titled International Environmental and Developmental Agencies Organizations and Programs on the World Wide Web Latin America the Caribbean examines a region waking up to its environmental problems and possibilities *People, Plants, and Protected Areas* John D. Tuxill, Gary Paul Nabhan, 2001 An invaluable practical guide to the management and conservation of plant resources in their natural habitats Indians, Markets, and Rainforests Ricardo A. Godoy, 2001 Godoy investigates five lowland Amerindian societies of tropical Latin America all of which are experiencing deep changes as they modernize to discover the results of a market economy on both indigenous peoples and the conservation of tropical rainforest flora and fauna *The Maya Tropical Forest* James D. Nations, 2010-01-01 The Maya Tropical Forest which occupies the lowlands of southern Mexico Guatemala and Belize is the closest rainforest to the United States and one of the most popular tourist destinations in the Western Hemisphere It has been home to the Maya peoples for nearly four millennia starting around 1800 BC Ancient cities in the rainforest such as Palenque Yaxchilan Tikal and Caracol draw thousands of tourists and scholars seeking to learn more about the prehistoric Maya Their contemporary descendants

the modern Maya utilize the forest's natural resources in village life and international trade while striving to protect their homeland from deforestation and environmental degradation Writing for both visitors and conservationists James Nations tells the fascinating story of how ancient and modern Maya peoples have used and guarded the rich natural resources of the Maya Tropical Forest He opens with a natural history that profiles the forest's significant animals and plants Nations then describes the Maya peoples biological preserves and major archaeological sites in Mexico Guatemala and Belize Drawing on more than twenty five years of conservation work in the Maya Tropical Forest Nations tells first hand stories of the creation of national parks and other protected areas to safeguard the region's natural resources and archaeological heritage He concludes with an expert assessment of the forest's future in which he calls for expanded archaeological tourism to create an ecologically sustainable economic base for the region Indigenous Environmental Knowledge John Edington, 2017-09-05 This book examines comprehensively for the first time the scope and accuracy of indigenous environmental knowledge It shows that in some spheres including agriculture house design fuel and water manipulation the high reputation of local observers is well deserved and often sufficiently insightful to warrant wider imitation However it also reveals that in certain matters notably some aspects of health care and wild species population management local knowledge systems are conspicuously unsound Not all the difficulties are of the communities own making some stem from external factors outside their control However in either case remedial measures can be suggested and this book describes especially for the benefit of practitioners what steps might be taken in rural communities to improve the quality of life The possibility of useful transfers of information from local settings to Western ones is not ignored and forms the subject of the book's final chapter
