 2018 13th International Conference on e-Learning* Professor Eunice Ivala, 2018-07-05 Language and Institutional Identity
 in the Post-Apartheid South African Higher Education Leketi Makalela, 2022-03-21 This book examines the intersections
 between education identity formation and language in post apartheid South Africa with specific attention to higher education
 It does so against the backdrop of the core argument that the sector plays a critical role in shaping re producing and
 perpetuating sectoral class sub national and national identities which in turn in the peculiar South African setting are almost
 invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial
 identity The chapters in the book grapple with the nuances related to these intersections in the understanding that higher
 education language policies overt and or covert largely structure institutional cultures or what has been described as
 curriculum in higher education institutions Together the chapters examine the roles played by higher education by language
 policies and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating or
 deconstructing ethnolinguistic identities upon which the sector was founded The introductory chapter lays out the
 background to the entire book with an emphasis on the policy and practice perspectives on the intersections The middle
 chapters describe the so called White Universities Black Universities and Middle Man Minorities Universities The final
 chapter maps out future directions of the discourses on language and identity formation in South Africa s higher education

Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebeso, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes

practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research
