Unplugged Reclaiming Our Right To Die In America:

Unplugged William H. Colby, 2006 Medical technology has helped mankind conquer tuberculosis polio and countless other once certain death diseases It has given us hope against cancer and AIDS allowed heart and brain surgeries that have saved untold numbers of lives and delivered us from the pain and crippling legacy of injury Medical technology it seems is a never ending string of miracles But it is also a double edged sword More often than not death today happens because of a decision to stop doing something or to not do it at all As the tragic life and death of Terri Schiavo so poignantly illustrated universal definitions of life death nature and many other concepts are elusive at best Unplugged addresses the fundamental questions of the right to die debate and discusses how the medical advances that bring so much hope and healing have also helped to create today's dilemma This compelling book explores recent high profile cases including that of Mrs Schiavo and illuminates the complex legal ethical medical and deeply personal issues of a debate that ultimately affects us all

Compassionate and beautifully written the book helps readers understand the implications of current laws and proposed legislation various medical options including hospice and the typical end of life decisions we all must face in order to make informed decisions for ourselves and our loved ones The hardcover edition of Unplugged was chosen by The Library Journal as one of the Best Consumer Health Books of 2006 Bioethics Carla Mooney, Leanne K. Currie-McGhee, 2009-05-29

Neumann, 2017-02-07 Following the death of her father journalist and hospice volunteer Ann Neumann sets out to examine what it means to die well in the United States When Ann Neumann's father was diagnosed with non Hodgkin's lymphoma she left her job and moved back to her hometown of Lancaster Pennsylvania She became his full time caregiver cooking cleaning and administering medications When her father died she was undone by the experience by grief and the visceral quality of dying Neumann struggled to put her life back in order and found herself haunted by a question Was her father's death a good death The way we talk about dying and the way we actually die are two very different things she discovered and many of us are shielded from what death actually looks like To gain a better understanding Neumann became a hospice volunteer and set out to discover what a good death is today She attended conferences academic lectures and grief sessions in church

basements She went to Montana to talk with the attorney who successfully argued for the legalization of aid in dying and to Scranton Pennsylvania to listen to pro life groups who believe the removal of feeding tubes from some patients is tantamount to murder Above all she listened to the stories of those who were close to death What Neumann found is that death in contemporary America is much more complicated than we think Medical technologies and increased life expectancies have changed the very definition of medical death And although death is our common fate it is also a divisive issue that we all experience differently What constitutes a good death is unique to each of us depending on our age race economic status culture and beliefs What s more differing concepts of choice autonomy and consent make death a contested landscape governed by social medical legal and religious systems In these pages Neumann brings us intimate portraits of the nurses patients bishops bioethicists and activists who are shaping the way we die The Good Death presents a fearless examination of how we approach death and how those of us close to dying loved ones live in death s wake Choosing to Live, Choosing to Die Nikki Tate,2019-09-17 Tate s sprawling work is a fascinating guide that belongs in all middle school high school and public libraries This resource will help tweens and teens looking to better understand death and dying for personal or academic purposes School Library Journal starred review With many jurisdictions considering whether or not to implement new assisted death legislation Choosing to Live Choosing to Die is a timely look at the subject for teen readers who may not yet have had much experience with death and dying Readers are introduced to the topic of assisted dying through the author s own story The issue continues to be hotly debated in families communities and countries around the world and there are no easy answers Choosing to Live Choosing to Die looks at the issue from multiple perspectives and encourages readers to listen with an open mind and a kind heart and reach their own conclusions **Battleground: Government and Politics** Lori A. Johnson,Kathleen Uradnik,Sara Beth Hower Ph.D.,2011-09-23 Through a detailed exploration of the viewpoints involved this balanced and incisive work promotes understanding of the most divisive issues in American government today Government and politics is an area in which there are no right answers but much room for debate Battleground Government and Politics allows students and general readers alike to consider key political debates from all sides and to arrive at their own considered convictions based on a firm understanding of the issues and points of view involved This two volume work explores dozens of the most contentious issues in contemporary life issues that impact how our government is run today and how it will be run in the future Each topic is examined in a balanced way providing not only an overview of the issues involved but an objective assessment of the stance of all sides Readers can use these entries as thorough and solid summaries of the most contentious controversies in contemporary society or as starting points for more in depth research into the debates At Liberty to Die Howard Ball,2012-06-11 Ball s arguments are concise compelling and backed with considerable case law This volume is highly recommended for upper level undergraduates and above in law philosophy and the medical humanities interested in the right to die debates Summing up Highly recommended Choice Over the past

hundred years average life expectancy in America has nearly doubled due largely to scientific and medical advances but also as a consequence of safer working conditions a heightened awareness of the importance of diet and health and other factors Yet while longevity is celebrated as an achievement in modern civilization the longer people live the more likely they are to succumb to chronic terminal illnesses In 1900 the average life expectancy was 47 years with a majority of American deaths attributed to influenza tuberculosis pneumonia or other diseases In 2000 the average life expectancy was nearly 80 years and for too many people these long lifespans included cancer heart failure Lou Gehrig's disease AIDS or other fatal illnesses and with them came debilitating pain and the loss of a once full and often independent lifestyle In this compelling and provocative book noted legal scholar Howard Ball poses the pressing question is it appropriate legally and ethically for a competent individual to have the liberty to decide how and when to die when faced with a terminal illness At Liberty to Die charts how the right of a competent terminally ill person to die on his or her own terms with the help of a doctor has come deeply embroiled in debates about the relationship between religion civil liberties politics and law in American life Exploring both the legal rulings and the media frenzies that accompanied the Terry Schiavo case and others like it Howard Ball contends that despite raging battles in all the states where right to die legislation has been proposed the opposition to the right to die is intractable in its stance Combining constitutional analysis legal history and current events Ball surveys the constitutional arguments that have driven the right to die debate

Death with Dignity Robert Orfali, 2011 In this book the author makes a case for legalized physician assisted dying Using the latest data from Oregon and the Netherlands he puts a new slant on perennial debate topics such as slippery slopes the integrity of medicine and sanctity of life This book provides an in depth look at how we die in America today It examines the shortcomings of our end of life system You will learn about terminal torture in hospital ICUs and about the alternatives hospice and palliative care The author scrutinizes the good the bad and the ugly He provides a critique of the practice of palliative sedation The book makes a strong case that assisted dying complements hospice By providing both Oregon now has the best palliative care system in America This book above all may help you or someone you care about navigate this strange landscape we call end of life It can be an informed guide to a good death in the age of hospice and high tech medical intervention

Decision Making near the End of Life James L. Werth Jr., Dean Blevins, 2008-10-20 Decision Making near the End of Life provides a comprehensive overview of the recent developments that have impacted decision making processes within the field of end of life care The most current developments in all aspects of major underlying issues such as public attitudes the impact of media bioethics and legal precedent provide the background information for the text The authors examine various aspects of end of life choices and decision making including communication between and among family medical personnel the dying person advance directives and the emergence of hospice and palliative care institutions The book also explores a variety of psychosocial considerations that arise in decision making including religion spirituality family caregiving disenfranchised and diverse groups and the

psychological and psychiatric problems that can impact both the dying person and loved ones Case studies and first person stories about decision making written by professionals in the field bring a uniquely personal touch to this valuable text

The Five Rights of the Individual Philip Schuyler, 2012 The US government makes 350 pages of new laws each day including directives of policy that limit what an individual may do at home alone or with consenting adults Such laws are intended to make people safer healthier or more productive but they often violate the Five Rights because they sacrifice personal choices to some presumed greater good Directives of policy may include laws that violate the rights to privacy or free speech laws restricting abortion or physician assisted suicide restrictions on gun rights prohibitions on unhealthy foods cigarettes alcohol or drugs laws that discriminate against gays and laws that violate property rights Drug prohibition laws have been the most damaging Over the past 40 years the US population grew 50 percent while its prison population grew 1 000 percent due mostly to antidrug laws There are now two million Americans in jail half of whom didn't harm coerce or defraud anyone The land of the free has one twentieth of the world's population and one fifth of its prison population Our incarceration rate is seven times that of European countries No democracy has ever had such a large percentage of its people behind bars Legalization of marijuana and decriminalization of other drugs would free hundreds of thousands of individuals end prison overcrowding and save billions of dollars now spent trying to enforce unenforceable laws There would be less need for spying wiretapping and breaking down doors Americans could stop thinking of the police as the enemy and vice versa permitting a renewal of respect for the Five Rights

Deconstructing Dignity Scott Cutler Shershow, 2024-05-31 The right to die debate has gone on for centuries playing out most recently as a spectacle of protest surrounding figures such as Terry Schiavo In *Deconstructing Dignity* Scott Cutler Shershow offers a powerful new way of thinking about it philosophically Focusing on the concepts of human dignity and the sanctity of life he employs Derridean deconstruction to uncover self contradictory and damaging assumptions that underlie both sides of the debate Shershow examines texts from Cicero's *De Officiis* to Kant's *Groundwork of the Metaphysics of Morals* to court decisions and religious declarations Through them he reveals how arguments both supporting and denying the right to die undermine their own unconditional concepts of human dignity and the sanctity of life with a hidden conditional logic one often tied to practical economic concerns and the scarcity or unequal distribution of medical resources He goes on to examine the exceptional case of self sacrifice closing with a vision of a society one whose conditions we are far from meeting in which the debate can finally be resolved A sophisticated analysis of a heated topic *Deconstructing Dignity* is also a masterful example of deconstructionist methods at work
