An Evolutionary History of the Gangs and Factions of Rio de Janeiro Andrea Varsori, 2025-09-26 The book provides a compelling and comprehensive explanation of the puzzling resilience of the gangs that have operated in Rio de Janeiro since the 1980s. It offers a broad overview of the history of gangs and gang alliances/factions in the whole of the city, focussing on the evolution and consistency of these groups over time, positing the link between these and the groups' chances of survival. It draws on more than 285 articles from 15 newspapers and media outlets across a time span covering more than 40 years, supplemented with interviews with high ranking public security officers and secondary data. Applying a novel and composite translation of biological evolutionary concepts to a complex criminological context, it focusses on three main fields of interest: territory relations and internal dynamics.

The Blue Compendium Jane Lubchenco, Peter M. Haugan, 2023-05-24 Home to over 80 percent of all life on Earth, the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people. The relevance of the ocean for humanity's future is undisputed. However, the ocean's great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential, as well as management and governance challenges, pose impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel of Experts for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean issues. Altogether, *The Blue Compendium* offers innovative ocean solutions in technology, policy, governance, and finance realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean. The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business, finance, and civil society.

Zoonotic Pathogens in the Food Chain Denis O. Krause, Stephen Hendrick, 2010 Examining the development, spread, and transmission of zoonotic diseases through the food chain from animals through production processes to humans, this book discusses the ways modern food production systems contribute to the risk of zoonotic disease and where mitigation strategies need to be focused. Covering factors in the animal production process and attributes of microorganisms that allow potential contamination of food sources, this book discusses pathogens that have recently emerged as important infections and new trends in animal production such as organic livestock farming and raw.

International Handbook of Rural Criminology Joseph F Donnermeyer, 2016-04-28 49% of the world's population lives in small towns, villages, and farms, yet until recent years, criminological scholarship has focused almost exclusively on urban crimes. The Routledge International Handbook of Rural Criminology is the first major publication to bring together this growing body of scholarship under a single cover. For many years, rural criminology has remained marginalized and often excluded from the mainstream, with precedence given to urban criminology; this volume intends to address that imbalance. Pioneering in scope, this book brings together leading international scholars from fourteen different countries to offer an authoritative synthesis of theoretical and empirical literature. This handbook is divided into seven parts, each addressing a different aspect of rural criminology: Rurality and crime; Criminological dimensions of food and agriculture; Violence and rurality; Drug use, production, and trafficking in the rural context; Intersections between rural and green criminology; Policing justice and rurality; Teaching rural criminology. Edited by a world-renowned scholar of rural criminology, this book explores rural crime issues in over thirty-five countries, including Japan, Sweden, Brazil, Australia, Tanzania, the US, and the UK. This is the first Handbook dedicated to rural criminology and is an essential resource for criminologists, sociologists, and social geographers engaged with rural studies and crime.

The Urban World J. John Palen, 2019 The Urban World Eleventh Edition provides a comprehensive, balanced, up-to-date, and cross-cultural look at cities and suburbs around the world. Offering a twenty-first-century view of the changing urban scene, the text covers evolving urban patterns and the changing nature of urban life. Combining expert scholarship with an accessible style, J. John Palen is one of America's leading urban sociologists. He adds fresh data and insights to each edition of his text.

Interpreting Our World Joseph J. Kerski, 2016-10-17 This important book demonstrates why geography matters in the modern-day world through its examination of 100 moments throughout history that had a significant impact on the study of geography, literally writing about the earth. Geography is not simply accounts of the lands of earth and their features; it's about discovering everything there is to know about our planet. This book shows why geography is of critical importance to our world's 21st-century inhabitants through an exploration of the past and present discoveries that have been made about the earth. It pinpoints 100 moments throughout history that had a significant impact on the study of geography and the understanding of our world, including widely accepted maps of the ancient world, writings and discoveries of key thinkers and philosophers, key exploration events and findings during the Age of Discovery, the foundations of important geographic organizations and inventions in digital mapping. The book begins with a clear explanation of geography as a discipline, a framework, and a way of viewing the world, followed by coverage of each of the 100 discoveries and innovations that provides sufficient background and content for readers to understand each topic. The book concludes with a concise synopsis of why it all matters and a look forward to 10 possible future discoveries in the next 50 years of geography. Students will gain a clear sense of what is truly revolutionary about geography, perhaps challenging their preconceived notion of what geography actually is and grasp how important discoveries revolutionized not
