Therapeutic Nanocarriers in Cancer Treatment: Challenges and Future Perspective Neeraj Mishra,Ashish Garg,Neeraj Upmanyu,2023-03-06 Nanotechnology has revolutionized cancer diagnosis and therapy through targeted drug delivery Advances in protein engineering and materials science have led to the development of nanocarriers NCs which have helped overcome the challenges faced during conventional cancer treatment These nanocarriers serve as an efficient transport module for drugs Nano drug delivery has emerged as a promising technology that results in early detection and better treatment of various cancers The approved nanoparticles currently used in cancer treatment strategies include liposomes dendrimers polyplexes solid lipid nano carriers etc These nanocarriers can potentially provide a quick safe and cost effective method in cancer therapy and management This book presents thirteen chapters that cover cancer nanotherapeutics for various cancers The reference covers lung breast cervical ovarian colon prostate and head and neck cancers Each chapter reviews advanced data from existing and ongoing clinical research and major regulatory considerations A list of scientific references for further reading supplements every chapter Readers will be able to understand recent advances and challenges faced by researchers in cancer nanomedicine This reference book will greatly benefit undergraduate and postgraduate students oncologists pharmacists and researchers involved in nanomedicine and nano drug delivery Health Services for Cancer Survivors Michael Feuerstein,Patricia A. Ganz,2011-06-15 Health has been conceptualized by world and national health organizations WHO CDC Healthy People 2010 as more than the absence of disease It involves a focus on physical psychosocial and functional aspects of life as well as the prevention of future illnesses At this point in the development of quality health care for cancer survivors there is sufficient knowledge and expert opinion to push efforts forward to improve the health of cancer survivors Clearly there is more research in the most prevalent forms of cancers e g breast cancer than others that provide us with guidance on how to optimize their health but there are data on other forms of cancers that can also better inform practice There may also be general care practices that can cut across cancer types There has been an

emergence of epidemiological and clinical research in cancer survivors that can form the basis for a revolution in the quality and nature of health care that survivors receive This book not only provides the reader with diverse perspectives and data but also integrates this information so it can serve as the foundation necessary to improve and maintain the health of cancer survivors Reporting of symptoms to health care providers is a complex multi determined problem influenced not only by the pathophysiology but also as we have learned over the years through pain research by societal cultural and biobehavioral factors This book will consider this important aspect of follow up for millions of cancer survivors because of the strong reliance on symptom reporting for clinical decision making In order for us to generate meaningful and effective treatment we need to better understand the symptom experience in cancer survivors This book provides much information that will assist us to better understand and manage this complicated end point The presenting problems need to be articulated and conceptualized as clearly as possible by both parties so appropriate actions can be taken Since health care costs are a major concern for patients payers and providers this area will also be addressed in all the relevant sections In taking an interdisciplinary perspective this book illustrates the importance of a team approach to the improvement of health care and associated health well being and functioning in cancer survivors The 17 chapters cover critical topics of which physicians and providers of all types must be aware in order to provide the most comprehensive and responsive care for cancer survivors All of the clinical care chapters include case studies to illustrate the real world application of these approaches in cancer survivors Information about sources of referral both within and outside the traditional health care communities will be provided in tabular form There is no other text that provides both an overview of the problems and their challenges case illustrations of direct application and the reality of reimbursement for such care The editors hope that there may be no need for the clinician or the survivor to adapt to a new normal if the presenting problems are understood and handled from an interdisciplinary perspective as outlined here
