An Account of the Countries Adjoining to Hudson's Bay, in the North-West Part of America Dobbs,1744 **The Last Harvest** John Burroughs,2022-09-16 In *The Last Harvest* John Burroughs deftly intertwines the themes of nature time and the human condition through his rich and poetic prose The book is a reflective exploration of rural life and the cyclical nature of seasons encapsulating the essence of American transcendentalism Burroughs employs evocative imagery and a lyrical style that evokes a deep appreciation for the natural world while simultaneously confronting the inevitability of change and loss The narrative is steeped in introspective observations rendering it both a personal memoir and a philosophical treatise on the interconnectedness of life and nature John Burroughs a prominent naturalist and essayist of the late 19th and early 20th centuries was deeply influenced by the American landscape throughout his life His childhood in rural New York and his keen observations of nature informed his writings allowing him to capture the beauty and complexity of the world around him Burroughs commitment to environmental preservation and his friendships with contemporaries like Walt Whitman and John Muir provided a profound context for *The Last Harvest* which reflects his deep reverence for the natural world This book is essential reading for anyone enamored with nature especially those who appreciate the philosophical undertones of naturalism Burroughs reflective insights and vivid descriptions offer an enriching experience for readers inviting them to contemplate their own relationship with the environment and the passage of time *Philosophy, or truth? Royal Irish Academy Royal Irish Academy. Museum,William Robert Wilde,1863 **Fuzzy Logic** Vladimir Dimitrov,Victor Korotkich,2002-02-26 At the beginning of the new millennium fuzzy logic opens a new challenging perspective in information processing This perspective emerges out of the ideas of the founder of fuzzy logic Lotfi Zadeh to develop soft tools for direct computing with human perceptions The enigmatic nature of human perceptions manifests in their unique capacity to generalize extract patterns and capture both the essence and the integrity of the events and phenomena in human life This capacity goes together with an intrinsic imprecision of the perception based information According to Zadeh it is because of the imprecision of the human imprecision that they do not lend themselves to meaning representation through the use of precise methods based on predicate logic This is the principal reason why existing scientific theories do not have the capability to operate on perception based information We are at the eve of the emergence of a theory with such a capability Its applicative effectiveness has been already demonstrated through the industrial implementation of the soft computing a powerful intelligent technology centred in fuzzy logic At the focus of the papers included in this book is the knowledge and

experience of the researchers in relation both to the engineering applications of soft computing and to its social and philosophical implications at the dawn of the third millennium The papers clearly demonstrate that Fuzzy Logic revolutionizes general approaches for solving applied problems and reveals deep connections between them and their solutions
