

The background of the cover features a complex network of thin, teal-colored lines that intersect to form a web-like pattern. Three large, hand-drawn maroon circles are overlaid on this network. Each circle has a central point from which several teal lines radiate outwards, creating a starburst or hub-and-spoke effect within each circle. The overall aesthetic is technical and interconnected, suggesting a network or cluster structure.

What Makes Clusters Competitive Cases From The Global Wine Industry:

What Makes Clusters Competitive? Anil Hira, 2013-11-01 While global competitiveness is increasingly invoked as necessary for economic success stories there are few answers available about how it can be achieved or maintained The idea of stimulating industries to spur on economies is often proposed but industrial policy can be seen as a boondoggle of government spending and theorists of globalization are doubtful that such efforts can succeed in a world of fragmented supply chains What Makes Clusters Competitive tests fundamental theoretical hypotheses about what makes industries competitive in a globalized world by using the wine industries of several countries as case studies Extremadura Spain Tuscany Italy South Australia Chile and British Columbia Canada Taking into account historical and location specific characteristics and drawing out policy lessons for other regions that would like to promote their industries this volume demonstrates the value of applying cluster theory to understand market forces while also describing the forces underlying the development of the wine industry in a range of different settings An excellent resource for those interested in what makes industries succeed or struggle What Makes Clusters Competitive offers guidance for policymakers and the private sector on how to promote local industries Contributors include David Aylward Alexis Bwenge Sara Daniele F J Mesquita Daz Christian Felzenstein Husam Gabreldar F Pulido Garcia Sarah Giest Elisa Giuliani Andy Hira Mike Howlett A F Pulido Moreno and Oriana Perrone Strategic Winery Tourism and Management Kyuho Lee, 2016-01-05 Strategic Winery Tourism and Management Building Competitive Winery Tourism and Winery Management Strategy presents cutting edge knowledge and research related to strategic winery tourism and winery management It highlights the major theories on strategic winery tourism and winery management and encompasses a variety of topics ranging from strate *Structural Transformation in South Africa* Antonio Andreoni, Pamela Mondliwa, Simon Roberts, Fiona Tregenna, 2021 Taking South Africa as an important case study of the challenges of structural transformation Structural Transformation in South Africa offers a new micro meso level framework and evidence linking country specific and global dynamics of change with a focus on the current challenges and opportunities faced by middle income countries Detailed analyses of industry groupings and interests in South Africa reveal the complex set of interlocking country specific factors which have hampered structural transformation over several decades but also the emerging productive areas and opportunities for structural change The structural transformation trajectory of South Africa presents a unique country case given its industrial structure concentration and highly internationalized economy as well as the objective of black economic empowerment Structural Transformation in South Africa links these micro meso dynamics to global forces driving economic institutional and social change This include digital industrialization global value chain consolidation financialization environmental and other sustainability challenges which are reshaping structural transformation dynamics across middle income countries like South Africa While these new drivers of change are disrupting existing industries and interests in some areas in others they are reinforcing existing trends and

configurations of power The book analyses the ways in which both the domestic and global drivers of structural transformation shape and in some cases are shaped by a country's political settlement and its evolution By focusing on the political economy of structural transformation the book disentangles the specific dynamics underlying the South African experience of the middle income country conundrum In so doing it brings to light the broader challenges faced by similar countries in achieving structural transformation via industrial policies *The Capacity to Innovate* Sarah Giest,2021-04-07 In *The Capacity to Innovate* Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations The book offers a detailed view of the vertical multi level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported Using the biotechnology field as an example Giest highlights challenges in the collaborative efforts of public bodies private companies and research institutes to establish a successful ecosystem of innovation in this sector The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance Currently governments operate at different levels from the local to the supranational in order to support clusters and cluster policies are often pursued alongside other programs leading to uncoordinated efforts and ineffective cluster strategies *The Capacity to Innovate* advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context *The Communal Consumption Experience* Brittney C. Bauer,Adam J. Mills,2025-06-27 This book examines how shared consumption experiences shape consumer behavior market strategies and social connection From wine tastings and direct selling events to hospitality and digital engagement it explores the evolving ways people come together to consume celebrate and connect Using communal wine consumption as a case study this volume reveals how shared rituals from intimate gatherings to large scale events drive economic and cultural trends Topics include the role of social interaction in purchasing decisions the balance of competition and collaboration in business and the rise of digital platforms that reshape traditional consumption experiences This book is essential for scholars industry professionals and anyone interested in marketing consumer psychology and experiential commerce as it offers a fresh perspective on the power of shared consumption in an evolving marketplace The chapters in this book were originally published as a special issue of *Journal of Wine Research*

Business, Power and Sustainability in a World of Global Value Chains Stefano Ponte,2019-08-15 The interaction of sustainability governance and global value chains has crucial implications the world over When it comes to sustainability the last decade has witnessed the birth of hybrid forms of governance where business civil society and public actors interact at different levels leading to a focus on concepts of legitimacy within multi stakeholder initiatives MSIs Based in over 15 years of theoretical engagement and field research *Business Power and Sustainability* draws from both labour intensive value chains such as in the agro food sector coffee wine fish biofuels palm oil and from capital intensive value chains such as in

shipping and aviation to discuss how sustainability governance can be best designed managed and institutionalized in today's world of global value chains GVCs Examining current theoretical and analytical efforts aimed at including sustainability issues in GVC governance theory it expands on recent work examining GVC upgrading by introducing the concept of environmental upgrading and through new conceptions of orchestration it provides suggestions for how governments and international organizations can best facilitate the achievement of sustainability goals Essential reading on the governance of sustainability in the twenty first century **The Political Economy of Natural Resources and Development** Paul A.

Haslam, Pablo Heidrich, 2016-02-05 The Political Economy of Resources and Development offers a unique and multidisciplinary perspective on how the commodity boom of the mid 2000s reshaped the model of development throughout Latin America and elsewhere in the developing world Governments increased taxes and royalties on the resource sector the nationalization of foreign firms returned to the mainstream economic policy agenda and public spending on social and developmental goals surged These trends often described as resource nationalism have developed into a strategy for economic development generated a re imagining of the state and its institutional possibilities and created a new but very significant political risk for extractive enterprises However these innovations which constitute the most dramatic change in development policy in Latin America since the advent of neoliberalism have so far received little attention from either academic or policy oriented publications This book explores the reasons behind these policies and their effects on states firms and development trajectories This text brings together renowned thematic experts to examine the political economic causes of resource nationalism as well as its manifestation in six Latin American countries The causal variables considered by the contributors to this collection include a range of political economic determinants of policy including commodity prices the influence of ideology and national politics ideas about industrial policy relations between host governments and investors and how countries respond to opportunities provided by regional initiatives and the new geography of the global economy This volume is essential reading in development economics political economy and Latin American studies as well as for those who want to understand what economic development means after neoliberalism Governing Corporate Social Responsibility in

the Apparel Industry after Rana Plaza Anil Hira, Maureen Benson-Rea, 2017-05-22 This edited collection critically explores the efforts of the apparel industry to improve safety conditions and suggests governance reforms that will resolve lingering issues The volume examines two consortia the Alliance and the Accord which set up cooperative auditing systems of supplying factories and penalties for non compliance and include funding to help factories comply and for workers if factories are idled during repairs though the editors raise doubts about the long lasting value of such efforts In the wake of the 2013 Rana Plaza disaster leading researchers across labor relations and industry studies tackle and debate such issues giving their perspective of how multinationals operating in developing countries should regulate labor standards in order to resolve and improve the substandard working conditions under which much of our clothing is made Rural-Urban Linkages for

Sustainable Development Armin Kratzer, Jutta Kister, 2020-09-23 This book critically examines different forms of urban rural links for sustainable development in different countries As intertwined processes of globalization digitalization environmental challenges and the search for sustainable development continue rural and urban areas around the world become increasingly interconnected and interdependent This book contributes to understanding the role of this growing interconnectedness from an economic geographical perspective It does so by theoretically and empirically addressing the various existing linkages such as food networks value chains and regional governance at local regional national and international levels In doing so contributions extend and contrast existing approaches dealing with urban and rural areas separately by considering the interplay between these two as well as their consequences for sustainability transition pathways This edited volume adds to the academic and policy debate by bringing together a variety of concepts and themes in order to shift the research and policy agenda away from simple dichotomy to different notions of rural urban linkages Offering multidisciplinary insights into rural urban linkages the book will be of interest to decision makers practitioners and researchers in the fields of economic geography regional planning food studies and economics

web 2 2 2 acid gas purification technology the flue gas from msw incineration contains so₂ nox hcl hf and other acid gases these gases are mainly removed by washing and the acid gas in the flue gas is removed by physical adsorption and chemical reaction the common control technology of acid gas

flue gas desulfurization products and other air emissions controls - May 03 2023

web jan 1 2017 in addition to removing so₃ dsi systems can also be used to remove other acid gases such as hcl dry sorbents remove so₃ by a gas solid reaction the alkaline sorbent is pneumatically injected upstream or downstream of the air heater and upstream of the existing particulate control device

flue gas desulfurization idc online - Feb 17 2022

web oct 21 1974 flue gas desulfurization is commonly known as fgd and is the technology used for removing sulfur dioxide so₂ from the exhaust combustion flue gases of power plants that burn coal or oil to produce steam for the

review of design operating and financial considerations in flue gas - Mar 01 2023

web the various flue gas desulfurization fgd technologies available in the market for the reduction of sulfur dioxide emissions are presented the process descriptions are discussed and the capital and operating costs of the various methods are presented

comprehensive evaluation of flue gas desulfurization and - Jun 04 2023

web aug 15 2020 post combustion flue gas desulfurization and denitrification technologies are essential in achieving the full compliance of fine particulate matter pm_{2.5} aerodynamic diameter less than 2.5 µm air quality standards by 2030 in china as sulfur dioxide so₂ and nitrogen oxides no_x are the main precursors of pm_{2.5}

modeling and optimization of wet flue gas desulfurization system - May 23 2022

web in the flue gas treatment systems in coal fired power plants wfgd systems are commonly installed downstream of the electrostatic precipitators sui et al citation 2016 and the pressure charging fans operating at positive pressure exhaust flue gas enters the wfgd system from the entrance which is located at the lower part of the tower

flue gas desulfurisation an overview sciencedirect topics - Sep 26 2022

web flue gas desulfurization fgd is a very common method for gas claning adopted in a gas processing plant in this process the flue gas with acid vapors is scrubbed to remove it as a by product most of the fgd processes use alkali to scrub the flue gas

air pollution control technology fact sheet us epa - Apr 21 2022

web flue gas desulfurization many wet systems reheat the flue gas downstream of the absorber to prevent corrosion caused by condensation inside the ducts and stack and reduce plume visibility

flue gas desulphurization an overview sciencedirect topics - Nov 28 2022

web flue gas desulfurization fgd material is a product of a process typically used for reducing so₂ emissions from the exhaust gas system of a coal fired boiler the physical nature of these materials varies from a wet sludge

diffusion of flue gas desulfurization reveals barriers and nature - Dec 30 2022

web aug 27 2020 both technologies aim to remove harmful emissions from flue gases sulfur dioxide so₂ and carbon dioxide co₂ to then be stored used as a by product or disposed of in the case of fgd

review of design operating and financial considerations in flue gas - Jul 05 2023

web flue gas desulfurization is an efficient method for the reduction of the sulfur dioxide emissions citation 2 many processes are available in the market such as a wet scrubbers b spray dry scrubbers c sorbent injection d regenerable processes and e combined so₂ no_x removal processes the different flue gas desulfurization

modeling of the wet flue gas desulfurization system to utilize low - Mar 21 2022

web nov 11 2020 abstract wet flue gas desulfurization was simulated to improve gypsum production using low grade limestone high grade limestone with 94 wt caco 3 content is used for producing gypsum with 93 wt purity but owing to the resource depletion of high grade limestone low grade limestone should be replaced as an alternative

sulfur dioxide removal an overview of regenerative flue gas - Aug 06 2023

web may 16 2020 numerous mitigation techniques have been incorporated to capture or remove so₂ with flue gas desulfurization fgd being the most common method regenerative fgd method is advantageous over other methods due to high desulfurization efficiency sorbent regenerability and reduction in waste handling

comprehensive evaluation of flue gas desulfurization and - Jan 31 2023

web introduction since the eleventh five year plan period the construction of flue gas desulfurization and denitrification facilities for coal fired power plants have been accelerated to control the emissions of sulfur dioxide so₂ and nitrogen oxides no_x and thus to address the issue of acid rain in china

flue gas desulfurization reducing acid rain howden - Oct 08 2023

web may 8 2020 flue gas desulfurization systems scrubbers flue gas desulfurization systems fgd or scrubbers are devices capable of sulfur removal efficiencies between 50 to 98 typically the highest removal is achieved by wet scrubbers and the lowest by dry scrubbers they are used in coal and oil fired combustion units including utility and
