Detention of Terrorism Suspects Maureen Duffy,2018-02-08 Controversial erosions of individual liberties in the name of anti terrorism are ongoing in liberal democracies The focus of this book is on the manner in which strategic discourse has been used to create accepted political narratives It specifically links aspects of that discourse to problematic and evolving terrorism detention practices that happen outside of traditional criminal and wartime paradigms with examples including the detentions at Guantanamo Bay and security certificates in Canada This book suggests that biased political discourse has in some respects continued to fuel public misconceptions about terrorism which have then led to problematic legal enactments supported by those misconceptions It introduces this idea by presenting current examples such as some of the language used by US President Donald Trump regarding terrorism and it argues that such language has supported questionable legal responses to terrorism It then critiques political arguments that began after 9 11 many of which are still foundational as terrorism detention practices evolve The focus is on language emanating from the US and the book links this language to specific examples of changed detention practices from the US Canada and the UK Terrorism is undoubtedly a real threat but that does not mean that all perceptions of how to respond to terrorism are valid As international terrorism continues to grow and to change this book offers valuable insights into problems that have arisen from specific responses with the objective of avoiding those problems going forward

What's Wrong with Addiction? Helen Keane,2002 This is an impressive work carefully structured researched and written a refreshingly lucid account that is both intellectually stimulating and professionally helpful Janet McCalman Addicts are generally regarded with either pity or

grave disapproval But is being addicted to something necessarily bad These attitudes are explicit both in contemporary medical literature and in popular self help texts We categorise addiction as unnatural diseased and self destructive We demonise pleasure and desire and view the addict as physically and morally damaged Helen Keane s thought provoking text examines these assumptions in a new light In asserting that the wrongness of addiction is not fixed or indeed obvious she presents a refreshing challenge to more conventional accounts of addiction She also investigates the notion that people can be addicted to eating love and sex just as they are to drugs and alcohol What s Wrong with Addiction shows that most of our ideas about addiction take certain ideals of health and normality for granted It exposes strains in our society s oppositions between health and disease between the natural and the artificial between order and disorder and between self and other

Weaponizing Civilian Protection Thomas Gregory,2025-01-18 Weaponizing Civilian Protection exposes how coalition efforts to minimize and mitigate civilian casualties during the recent conflict in Afghanistan also worked to rationalize the harm inflicted upon Afghan civilians Drawing on declassified documents and interviews with coalition officials it traces how civilian protection was reimagined as a martial tactic rather than a humanitarian imperative with coalition officials reframing civilian casualties as strategic setbacks that could imperil the entire mission This book examines the restrictions that coalition officials imposed on combat operations to minimize unnecessary harm to civilians whilst showing how these restrictions served to constitute civilian casualties as necessary in certain situations rendering their lives losable and their deaths ungrievable At the same time it examines the post incident mitigation measures coalition officials used to prevent civilian casualties becoming strategic setbacks including the condolence payments that were offered when civilians were harmed Rather than seeking to make amends for the harm inflicted upon them it claims that these post incident mitigation measures are best characterized as a necropolitical device concerned with managing mortality more effectively Crucially Weaponizing Civilian Protection shows that co opting civilian protection into a martial logic that is more concerned with winning wars than protecting the civilian population works to devalue and dehumanize civilians leaving them more vulnerable to death and destruction in future conflicts
