Grotesque Purgatory Henry W. Sullivan, 2010-11 Cervantes's great novel *Don Quixote* is a diptych the first part of which was published in 1605 and the second in 1615 Focusing almost entirely on the novel's second part Henry W Sullivan is the first critic to offer a systematic account of *Don Quixote*'s passage from madness to sanity Sullivan argues that Part II of the novel is a salvation epic within which the Cave of Montesinos episode is the single most important pivot in the Knight's confrontation with his own emotional difficulties In this carefully researched and challenging study Sullivan shows that chapters 22-24 the Cave of Montesinos episode represent an entrance into Purgatory while chapter 55 is the exit from this realm The Knight and his Squire are made to suffer excruciating torments in the chapters in between experiencing a Purgatory in this life This original reading of the book is coupled with an explanation that this Purgatory is grotesque since *Don Quixote*'s and *Sancho*'s sins are venial and can thus be cleansed by theological means against a background of comedy By combining these two aspects Sullivan exposes both the deeply agonizing and the comic aspects of the text In addition the combination of theological interpretation and Lacanian analysis to show *Don Quixote*'s salvation cure in this life results in a truly comprehensive vision of the Knight's progress Sullivan also summarizes in five different streams of critical tradition the

accumulated reception history of the Cave of Montesinos incident drawing on scholarly writings from the nineteenth century to the present

Women in Convent Spaces and the Music Networks of Early Modern Barcelona Ascensión Mazuela-Anguita, 2023-02-10 This book presents the first study of music in convent life in a single Hispanic city Barcelona during the early modern era Exploring how convents were involved in the musical networks operating in sixteenth century Barcelona it challenges the invisibility of women in music history and reveals the intrinsic role played by nuns and lay women in the city's urban musical culture Drawing on a wide range of archival sources this innovative study offers a cross disciplinary approach that not only reveals details of the rich musical life in Barcelona's nunneries but shows how they took part in wider national and transnational networks of musical distribution including religious commercial and social dimensions of music The connections of Barcelona convents to networks for the dissemination of music in and outside the city provide a rich example of the close relationship between musical networks urban society and popular culture Addressing how music was understood as a marker of identity prestige and social status and above all as a conduit between earth and heaven this book provides new insights into how women shaped musical traditions in the urban context It is essential reading for scholars of early modern history musicology history of religion and gender studies as well as all those with an interest in urban history and the city of Barcelona The book is supported by additional digital appendices which include Records of inquiries into the lineage of Santa Maria de Jonquieres nuns Development of the collections of choir books belonging to the convents of Santa Maria de Jonquieres and Sant Antoni i Santa Clara
