Database and Expert Systems Applications Abdelkader Hameurlain, Rosine Cicchetti, Roland Traunmüller, 2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2 6 2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised to final versions by their authors and arranged to the conference program This year 241 papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research

Optimization Methods in Mobile Communication Systems Milind Pande, Anand J.

Kulkarni, Apoorva S. Shastri, 2025-10-22 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content This machine generated volume with chapter introductions by the human expert of summaries of the existing studies furthers our understanding of the optimization methods in mobile communication systems The book provides a machine generated comprehensive yet classified review of the optimization methods techniques and approaches associated with different mobile communications and systems including wavelet based CR OFDM systems MIMO slot antenna with low mutual coupling for 5G networks etc It also covers mainly the techniques for performance analysis of MIMO systems such as the hybrid filtering technique for MIMO OFDM systems and artificial

intelligence solutions beyond 5G radio access networks Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content Bulletin of the Brooklyn Public Library Brooklyn Public Library,1917 **IoT and Big Data Technologies for Health Care** Shuihua Wang,Zheng Zhang,Yuan Xu,2022-06-17 This two volume set of LNICST 414 and 415 constitutes the refereed post conference proceedings of the 2nd International Conference on IoT and Big Data Technologies for Health Care IoT CARE 2021 which took place in October 2021 Due to COVID 19 pandemic the conference was held virtually The 79 revised full papers were carefully reviewed and selected from 165 submissions The papers are arranged thematically as follows Integrating healthcare with IoT Information fusion for the devices of IoT AI based internet of medical things **Thesaurus of ERIC Descriptors** ,1995 4th 7th eds contain a special chapter on The role and function of the thesaurus in education by Frederick Goodman *Suicide Terror* Ophir Falk, Henry Morgenstern,2009-07-15 Ophir Falk and Henry Morgenstern have compiled a book that should be read by anyone who is serious about winning the war on terror By painstakingly analyzing the empirical data they help us better understand the nature of our enemies and why they employ these barbaric tactics Most crucially they offer important insights on how terrorism can be effectively confronted and ultimately defeated In so doing they have performed an invaluable service for all those who are committed to winning this crucial battle Benjamin Netanyahu Prime Minister of Israel **FIRSTHAND ACCOUNTS AND ANALYSES FROM FRONTLINE PERSONNEL AND EXPERTS IN THE WAR AGAINST TERROR** Based on U S and Israeli experiences and detailed interviews with frontline personnel *Suicide Terror* enables policymakers first responders and students of homeland security to understand and deal with the growing threat of suicide terror It analyzes recent suicide attacks as well as our current vulnerabilities and high risk scenarios for future attacks Following the expert authors advice readers learn possible measures to prevent an attack Moreover they learn how to prepare for and implement an effective and quick response to minimize casualties and losses in the event of an attack

Following an overview and historical review of suicide terror the book covers Global jihad Israel's confrontation with suicide terrorism America's experience with suicide bombings Internationalization of suicide terrorism High risk scenarios and future trends Methods for confronting suicide terror Medical management of suicide terrorism Using eyewitness accounts the text re-creates the look and feel of actual terrorism incidents Detailed case studies help readers get into the minds of suicide terrorists in order to understand how to best prevent and confront these very dangerous threats This book is a definitive study of suicide terror synthesizing the experience of well known Israeli and American experts who have dealt with it firsthand Anyone responsible for understanding preventing and confronting this devastating threat should read this book and consider its recommendations with all seriousness

International Symposium for Intelligent Transportation and Smart City (ITASC) 2025 Proceedings Xiaoqing Zeng, Xiongyao Xie, Jian Sun, Limin Ma, Yinong Chen, 2025-08-20 This book presents selected papers of the 6th International Symposium for Intelligent Transportation and Smart City ITASC held at Tongji University Shanghai on May 16-17 2025 It investigates in detail aspects of intelligent transportation and smart city mainly focusing on the green traffic and urban utility tunnels Due to rapid development in the domain of intelligent transportation and smart city there are many popular topics such as the 2BWM system bus bike metro and walking transportation safety and environment protection urban utility design and application and the application of BIM in the city design It collects dozens of papers and lectures with high quality including some authoritative scholars and most experienced engineers latest achievements which provide guidance to those both in universities and entrepreneurs

Driving 5G Mobile Communications with Artificial Intelligence towards 6G Dragorad A. Milovanovic, Zoran S. Bojkovic, Tulsı Pawan Fowdur, 2023-04-06 Driving 5G Mobile Communications with Artificial Intelligence towards 6G presents current work and directions of continuous innovation and development in multimedia communications with a focus on services and users The fifth generation of mobile wireless networks achieved the first deployment by 2020 completed the first phase of evolution in 2022 and started transition phase of 5G Advanced toward the sixth generation Perhaps one of the most important innovations brought by 5G is the platform approach to connectivity i.e. a single standard that can adapt to the heterogeneous connectivity requirements of vastly different use cases 5G networks contain a list of different requirements standardized technical specifications and a range of implementation options with spectral efficiency latency and reliability as primary performance metrics Towards 6G machine learning ML and artificial

intelligence AI methods have recently proposed new approaches to modeling designing optimizing and implementing systems They are now matured technologies that improve many research fields significantly The area of wireless multimedia communications has developed immensely generating a large number of concepts ideas technical specifications mobile standards patents and articles Identifying the basic ideas and their complex interconnections becomes increasingly important The book is divided into three major parts with each part containing four or five chapters Advanced 5G communication Machine learning based communication and network automation Artificial Intelligence towards 6G The first part discusses three main scenarios and standard specification of 5G use cases eMBB URLLC mMTC vehicular systems beyond 5G and efficient edge architecture on NFV infrastructure In the second part different AI ML based methodologies and open research challenges are presented in introducing 5G AIoT artificial intelligence of things scheduling in 5G 6G communication systems application of DL techniques to modulation detection and channel coding as well as 5G Open Source tools for experimentations and testing The third part paved the way to deployment scenarios for different innovative services including technologies and applications of 5G 6G intelligent connectivity AI assisted eXtended Reality integrated 5G IoT architecture in next generation Smart Grid privacy requirements in a hyper connected world and evaluation of representative 6G use cases and technology trends The book is written by field experts from Europe and Mauritius who introduce a blend of scientific and engineering concepts covering this emerging wireless communication era It is a very good reference book for telecom professionals engineers and practitioner in various 5G vertical domains and finally a basis for student courses in 5G 6G wireless systems
