Hughes, 2015-10-05 Understanding both leadership and change have been recurrent and popular themes within the business management and organization studies literature However our understanding of leadership and organizational change in combination is far more limited The Leadership of Organizational Change offers a critical review of the evolution of leadership and organizational change for the past thirty five years taking stock of what we know identifying what we do not know and establishing how the study of the leadership of change should advance In the late seventies and early eighties as interest in managing and leading change was fuelled by the competitive threat of Asia in general and Japan in particular as perceived by western businesses and governments Burns 1978 writing in his landmark book Leadership at this time referred to an intellectual crisis The crisis of leadership today is the mediocrity or irresponsibility of so many of the men and women in

power but leadership rarely rises to the full need for it The fundamental crisis underlying mediocrity is intellectual If we know all too much about our leaders we know far too little about leadership While the study of managing change has benefitted from sustained critical scrutiny particularly in the last decade it is believed that this is to have been at the expense of critical scrutiny of leading change The Leadership of Organizational Change critically reviews how the study of leading change has advanced since 1978 and the crisis of intellectual mediocrity

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa s higher education sector is rooted in the country s divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly

reflection on where the university has come from and where it is seeking to go Moral Leadership Cam Caldwell, 2012-09-21 The challenge facing leaders in the 21st century is to restore stakeholder trust build employee commitment and create organizations that are able to sustain long term competitive advantage Great leadership combines both character and competence but corporate values must include excellence and quality as well as integrity and honesty Creating organizational systems that reinforce and support core values and that achieve outstanding performance must be founded upon principles that work on the street in the office and on the shop floor Ethical leadership that honors a commitment to world class standards is a mandatory requirement for today s incredibly competitive global business environment but ethical leadership encompasses far more than avoiding polluting the environment or misrepresenting product features to customers This book clarifies the duties and obligations that leaders owe to their many stakeholders as they seek to create long term wealth but it also provides insights about how to build the organizational culture and systems required to sustain highly ethical organizations that inspire commitment and compete successfully
