Transforming Education Meanings Myths Complexity:

Transforming Education Agnieszka Bates, 2015-12-14 *Transforming Education* challenges the current global orthodoxy that educational transformation can be achieved through a step by step implementation of centralised performance based strategies for school improvement. Complex responsive processes theory is utilised in an original way to critique leadership myths and explore the alternative deeper meanings of educational transformation. The theory opens up new forms of understanding about how ordinary practitioners negotiate the meanings of improvement in their everyday practice. It is in the gap between the emergence of these local interactions and the predetermined designs of policy makers that educational transformation can be lost or found. This book is an essential read for education professionals and students interested in the fields of complexity education policy leadership and management.

Moral Emotions and Human Interdependence in Character Education Agnieszka Bates, 2021-05-23 *Moral Emotions and Human Interdependence in Character Education* challenges contemporary mainstream approaches to character education predicated on individualism, essential virtues, and generic character skills. This book synthesizes perspectives from phenomenology, psychology, cultural sociology, and policy studies into a unique theoretical framework to reveal how ideas from positive psychology, emotional intelligence, and Aristotelian virtues have found their way into the classroom. The idealized self-reliant, resilient, atomized individual at the core of current character education is rejected as one-dimensional. Instead, this book argues for an alternative, more complex pedagogy of interdependence that promotes students
