The structure is rather nonlinear in an attempt to follow the intuition used when one creates a new technology to solve a certain problem. The target audience is Students in electronics communication and networking, Wireless engineers that are specialized in one area but want to know how the whole system works without going through all the details and math, Computer scientists that want to understand the fundamentals of wireless connectivity, the requirements and most importantly the limitations, Engineers in energy systems, logistics, transport and other vertical sectors that are increasingly reliant on wireless technology.
