Thing Explainer Randall Munroe, 2015-11-24 From the No 1 bestselling author of What If the man who created xkcd and explained the laws of science with cartoons comes a series of brilliantly simple diagrams blueprints if you want to be complicated about it that show how important things work from the nuclear bomb to the biro It's good to know what the parts of a thing are called but it's much more interesting to know what they do Richard Feynman once said that if you can't explain something to a first year student you don't really get it In Thing Explainer Randall Munroe takes a quantum leap past this he explains things using only drawings and a vocabulary of just our 1 000 or the ten hundred most common words Many of the things we use every day like our food heating radio boxes microwaves our very tall roads bridges and our computer rooms datacentres are strange to us So are the other worlds around our sun the solar system the big flat rocks we live on tectonic plates and even the stuff inside us cells Where do these things come from How do they work What do they look like if you open them up And what would happen if we heated them up cooled them down pointed them in a different direction or pressed this button In Thing Explainer Munroe gives us the answers to these questions and many many more Funny interesting and always understandable this book is for anyone age 5 to 105 who has ever wondered how things work and why

Meaningful Technologies Eric Chown, Fernando Nascimento, 2023-01-09 As smartphones mediate more of our activities they are changing our relationship with meaning To a teenager for example a conversation is just as likely to refer to an exchange of text messages as it is a face to face discussion Meanwhile Facebook has redefined what friendship means Snapchat what a memory means etc The kinds of changes smartphones bring are happening at rapid pace TikTok reached a billion users in just over three years whereas it took the telephone 75 years to reach a tenth of that number of people Meaningful Technologies How Digital Metaphors Change the Way We Think and Live by Eric Chown and Fernando Nascimento offers systematic reconsideration of the ways in which digital technologies impact our lives both individually and collectively Metaphors aren't just a clever way to describe technology they are also changing the way we think When we click on a picture of a shopping cart it connects a complex set of technologies to represent a simple idea that we're all familiar with A heart icon under a photo is understood as an easy way to express appreciation We aren't required to understand how technology works just how we interact with it The ambiguity of metaphors and the complexity of technology can also hide important realities about what is being described The cloud for example actually consists of very real data centers which consume huge amounts of natural resources to keep

running Meanwhile pressing that heart icon on a photo is a signal to the artificial intelligences running in your app that you want to see more things like that photo and that it should adjust what it knows about you accordingly There is a constant feedback loop between us and the digital technologies we use We are constantly using them and they are changing us through their usage Meaningful Technologies focuses on this loop from the perspectives of hermeneutic philosophy and cognitive science Through the former the authors examine meaning and how it changes over time Through the latter they gain understanding of how this feedback loop impacts individuals especially in terms of learning and attention Chown and Nascimento argue that on the one hand apps have a kind of agency never before possible in a technology but also that armed with a critical framework for examining such apps we can regain some of our own agency This book will appeal to scholars of digital media digital and computational studies and those interested in issues related to ethical impacts of digital technologies
