Thinking Ahead Essays On Big Data Digital Revolution And Participatory Market Society:

Thinking Ahead - Essays on Big Data, Digital Revolution, and Participatory Market Society Dirk Helbing, 2015-04-10 The rapidly progressing digital revolution is now touching the foundations of the governance of societal structures Humans are on the verge of evolving from consumers to prosumers and old entrenched theories in particular sociological and economic ones are falling prey to these rapid developments The original assumptions on which they are based are being questioned Each year we produce as much data as in the entire human history can we possibly create a global crystal ball to predict our future and to optimally govern our world Do we need wide scale surveillance to understand and manage the increasingly complex systems we are constructing or would bottom up approaches such as self regulating systems be a better solution to creating a more innovative more successful more resilient and ultimately happier society Working at the interface of complexity theory quantitative sociology and Big Data driven risk and knowledge management the author advocates the establishment of new participatory systems in our digital society to enhance coordination reduce conflict and above all reduce the tragedies of the commons resulting from the methods now used in political economic and management decision making The author Physicist Dirk Helbing is Professor of Computational Social Science at the Department of Humanities Social and Political Sciences and an affiliate of the Computer Science Department at ETH Zurich as well as co founder of ETH s Risk Center He is internationally known for the scientific coordination of the FuturICT Initiative which focuses on using smart data to understand techno socio economic systems Prof Helbing has produced an insightful and important set of essays on the ways in which big data and complexity science are changing our understanding of ourselves and our society and potentially allowing us to manage our societies much better than we are currently able to do Of special note are the essays that touch on the promises of big data along with the dangers this is material that we should all become familiar with Alex Pentland MIT author of Social Physics How Good Ideas Spread The Lessons From a New Science Dirk Helbing has established his reputation as one of the leading scientific thinkers on the dramatic impacts of the digital revolution on our society and economy Thinking Ahead is a most stimulating and provocative set of essays which deserves a wide audience Paul Ormerod economist and author of Butterfly Economics and Why Most Things Fail It is becoming increasingly clear that many of our institutions and social structures are in a bad way and urgently need fixing Financial crises international conflicts civil wars and terrorism inaction on climate change problems of poverty widening economic inequality health epidemics pollution and threats to digital privacy and identity are just some of the major challenges that we confront in the twenty first century These issues demand new and bold thinking and that is what Dirk Helbing offers in this collection of essays If even a fraction of these ideas pay off the consequences for global governance could be significant So this is a must read book for anyone concerned about the future Philip Ball science writer and author of Critical Mass This collection of papers brought together by Dirk Helbing is both timely and topical It raises concerns about Big Data which are truly

frightening and disconcerting that we do need to be aware of while at the same time offering some hope that the technology which has created the previously unthought of dangers to our privacy safety and democracy can be the means to address these dangers by enabling social economic and political participation and coordination not possible in the past It makes for compelling reading and I hope for timely action Eve Mitleton Kelly LSE author of Corporate Governance and Complexity Theory and editor of Co evolution of Intelligent Socio technical Systems **How and What Marketing Algorithms Think** Roberto Brognara,2022-10-27 This book argues that the apparent omnipotence of algorithms today is not what it seems particularly in marketing where they actually offer less than they could Considering the reasons behind this it also notes that Big Data has relaunched a kind of data glorification and automated procedures that culturally marketing has already recognized and overcome at least once This first generation of programmatic marketing which the giants of the digital economy launched 15 years ago and consolidated worldwide can be significantly improved with corresponding business results as well but first as this book shows we need to know which strategic and cultural boundaries impact Big Data

Towards Digital Enlightenment Dirk Helbing,2018-08-27 This new collection of essays follows in the footsteps of the successful volume Thinking Ahead Essays on Big Data Digital Revolution and Participatory Market Society published at a time when our societies were on a path to technological totalitarianism as exemplified by mass surveillance reported by Edward Snowden and others Meanwhile the threats have diversified and tech companies have gathered enough data to create detailed profiles about almost everyone living in the modern world profiles that can predict our behavior better than our friends families or even partners This is not only used to manipulate peoples opinions and voting behaviors but more generally to influence consumer behavior at all levels It is becoming increasingly clear that we are rapidly heading towards a cybernetic society in which algorithms and social bots aim to control both the societal dynamics and individual behaviors span lang EN US style font family However there are also silver linings most of the threats that have accumulated over the past years have been identified and regulations are on the way to being introduced Furthermore entirely novel approaches based on blockchain technology and other developments derived from complexity science offer the possibility of entirely redefining collective trust and building platforms to support our core societal values span lang EN US style font family This book conveys an encouraging vision of the future and provides a sketch of how it may look The road to digital enlightenment is still open but it needs to be taken now pbrp Next Civilization Dirk Helbing,2021-02-08 Digital transformation sounds harmless given that the explosion in data volumes processing power and Artificial Intelligence has driven humanity and the entire world to a point of no return We will surely see a new civilization but we are at a crossroads The future needs to be re invented decisions must be taken After the automation of factories and the creation of self driving cars the automation of society is on its way But there are two kinds of automation a centralized top down control of the world and a distributed control approach supporting local self organization Using the power of today s information systems governments and big

tech companies seem to engage in the first approach Might they even build a digital Crystal Ball that knows almost everything including your personality and a super intelligent digital God to control what we do We are much closer to such science fiction scenarios than you probably think In this much expanded second edition of *The Automation of Society is Next How to Survive the Digital Revolution* 2015 the author discusses lessons learned on digital democracy aspects of transhumanism and far reaching thoughts about life in the digital age and what it may mean to be human in the future

Big Data's Threat to Liberty Henrik Skaug Saetra, 2021-08-04 Big Data permeates all aspects of modern life and while there is no shortage of potential benefits resulting from this author Henrik Skaug Saetra argues that we must also understand the threats Big Data poses to liberty The issues discussed in *Big Data's Threat to Liberty* Surveillance Nudging and the Curation of Information are related to how we are constantly under surveillance Data is gathered from our homes our cars our smartphones various devices around the house and public sources such as facial recognition enabled camera surveillance and various websites and social networks Furthermore the information gathered is used to influence our actions Detailed personality profiles are utilized in order to make us purchase products and services or pay our taxes through tailor made nudges aimed at irrational and subconscious mechanisms and delivered with a level of precision only possible with Big Data driven algorithmic curation of data Finally the information we receive through various media is curated by algorithms and even people are curated in order to satisfy our desires By providing us with what the algorithm believes we want we are spared from the exposure of unpleasant information and even unpleasant people The ideological landscapes we traverse are thus characterized by conformity and a concomitant tyranny of popular opinion becomes ever more coercive as this occurs The question is How does being constantly watched manipulated and having our world views shaped as just described affect our freedom In this book it is argued that Big Data's threat to individual liberty is routinely misunderstood and underappreciated due to a vagueness resulting from the concept of liberty being used without it being defined or by the use of definitions based on flawed understandings of what liberty is In this new and unique contribution to the ethics of Big Data and artificial intelligence both these challenges are thoroughly addressed Explanation of key Big Data related technologies and how they affect modern society including explanation of surveillance technologies and nudging algorithms and how Big Data Machine Learning and Artificial Intelligence algorithms are used to tailor and mold opinion Conceptualization of the term liberty making the concept tangible as a clear understanding of various forms of liberty enables a proper debate about the effects of technology on liberty and a debate about what sort of liberty we value A thorough technical explanation of how Big Data influences individuals by way of surveillance that allows for detailed personality profiles nudging and the algorithmic curation of information

To the Man with a Hammer Bertelsmann Stiftung, 2016-02-16 In the face of rising complexity and systemic risks policy making appears at a breaking point If business and public leaders hope to create a sustainable and responsive economy they will need to break from traditional governance and embrace new innovative solutions Adopting new practices will be essential for our ability to detect and solve unprecedented challenges of the 21st century After all to the man who only has a hammer everything he encounters starts to look like a nail It is high time to augment the policymaker's toolbox This article collection helps point the way forward Gathering a distinguished panel of complexity experts and policy innovators it provides concrete examples of promising insights and tools drawing from complexity science the digital revolution and interdisciplinary approaches

Seeing Like a Platform Petter Törnberg, Justus Uitermark, 2025-01-29 Power needs abstraction to make the unwieldy complexity of the social world legible and manageable The proposition at the heart of *Seeing Like a Platform* is that digital technology brings new metaphors through which power operates While industrial modernity saw society as a machinery to be designed according to detailed blueprints digital modernity views society as organic and alive to be herded and nudged through digital infrastructures AI and algorithms *Seeing Like a Platform* explores the history meaning and far reaching consequences of this epistemological shift From social movements to Wikipedia from digital platforms to city planning from social science to media society is being redefined by ideas from complexity science While complexity offers a vision of a self organized society freed from hierarchies and overbearing bureaucracies it simultaneously enables new forms of domination and control Through theoretical reflections and case studies *Seeing Like a Platform* offers an inquiry into digital modernity Accessibly written and broad ranging it is an essential reading for scholars students and practitioners in fields such as sociology political science urban studies and technology studies It will also interest anyone keen to understand the profound impact of digital technologies on governance social organization and everyday life The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

New Urban Geographies of the Creative and Knowledge Economies Simonetta Armondi, Stefano Di Vita, 2019-10-23 The temporal and spatial intersection of information

and telecommunication technologies creative and knowledge economies and related new manufacturing systems has been leading to significant effects on urban socioeconomic and spatial configurations and public policies Specifically the post crisis emergence of innovative workplaces to accommodate these changes is creating socioeconomic and spatial features that are only recently beginning to be explored in the scholarly literature According to this scenario this edited book offers a variety of avenues for exploring the relationships between contemporary production activities and new workplaces in several urban contexts In particular it focuses on the consequences of these relationships in terms of regeneration of the urban fabric as well as on their implication in terms of urban policies This book represents early observation of the fast growing phenomenon of new productive activities and workplaces against the background of the gig economy and sharing economy paradigms Central to this discussion is the investigation of the connection between digital technologies new works and workplaces and urban change processes and projects by providing an additional contribution to new urban agendas for contemporary cities The chapters originally published as a special issue in the Journal of Urban Technology
