

From Just One Tree...

Draw some of the food chains supported by this tree by following these steps:

- 1) Draw a line from one kind of food on the tree to one animal in the first row that eats it.
- 2) Find an animal in the second row that might eat the animal you chose from the first row. Then draw an arrow from the animal in the first row to the one you chose in the second row.
- 3) Now draw a line from the animal in the second row to one in the third row who eats it, if there is one.
- 4) Repeat these steps, until you have drawn a food chain from all six types of food on the tree.

Use a different color for each food chain. One food chain has been done for you.

Now write out your food chains here:

Write the names of the animals in your food chains in the blanks below, starting with the animal you chose from the first row, then the one from the second row, and finally the one from the third row (leave it blank if you didn't use one.)

Sun --> tree (leaf buds) --> deer --> Florida panther

Sun --> tree (flowers) --> _____ --> _____

Sun --> tree (bark) --> _____ --> _____

Sun --> tree (leaves) --> _____ --> _____

Sun --> tree (roots) --> _____ --> _____

Sun --> tree (seeds) --> _____ --> _____

Did you notice that you must always start with the sun, and next comes a producer?
