Threats Without Enemies Gwyn Prins, 2013-11-05 The world is moving into a new era which will be dominated by a new range of threats and a new range of priorities Already headlines tell of storms and droughts mass emigrations the danger of old Soviet nuclear reactors and the thinning ozone layer and with the menaces of global warming deforestation pollution and loss of biodiversity the picture is likely to get bleaker Unlike traditional threats these are not made deliberately and standard military responses are usually inappropriate They are threats without enemies and they present quite new and fundamental challenges to the international community which has to find new methods and institutions as well as the resolve to tackle them In this book eminent experts describe the new threats and the scale of the dangers which they present and set out the political military and institutional changes needed Gwyn Prins is Director of the Global Security Programme at the University of Cambridge He is author of *Top guns* and *Toxic Whales* also published by Earthscan Progress For A Small Planet Three topics dominate discussions of the global environment pollution the consequences of the affluent running ever faster through finite resources and the growing tensions between rich and poor as a third of humanity continues to live and die in desperate poverty In this exceptional book Barbara Ward co author with Rene Dubos of the bestselling *Only One Earth* refused to see these processes as inevitable It describes new technologies for recycling waste for energy for getting more for less linking them to ordinary people's working lives It also suggests a strategy for meeting the basic needs of the disadvantaged and shows how the vast inequalities between countries can be reduced This perceptive survey of policies outlines a planetary bargain between the world's nations that would guarantee individual freedom from poverty and keep our shared biosphere in good working order Originally published in 1993

new technologies for recycling waste for energy for getting more for less linking them to ordinary people's working lives It also suggests a strategy for meeting the basic needs of the disadvantaged and shows how the vast inequalities between countries can be reduced This perceptive survey of policies outlines a planetary bargain between the world's nations that would guarantee individual freedom from poverty and keep our shared biosphere in good working order Originally published in 1993

The Illusion of Progress Alexander Gillespie, 2014-10-14 Is sustainable development a charade sold to an increasingly misled public This book presents a wide ranging penetrating critique of sustainability and what it actually means The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever increasing number of legislative environmental policies the real issues such as consumption population growth and equity are either sidestepped or manipulated in international policy and law Analyzing the main areas of concern economic growth market structure trade aid debt security and sovereignty he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability

Globalisation, Poverty and Conflict Max Spoor, 2004-09-21 This state of the art critical development reader examines the inter relationships between globalisation poverty and conflict It complements current debates in the field of development studies and in an era in which development fatigue seems to have become more profound than ever before it brings the importance of development once again to the forefront The contributions represent current thinking on and practice of development policy poverty reduction the need for multi level democratic institutions and the containing and prevention of conflicts

Criminalized Power Structures Michael Dziedzic, 2016-07-18 Criminalized power structures CPS are illicit networks that profit from transactions in black markets and from criminalized state institutions while perpetuating a culture of impunity The book articulates a typology for assessing the threats of CPS and for implementing appropriate strategies to achieve sustainable peace effectively and efficiently The international case studies address interventions undertaken either to support the implementation of a peace agreement i e a peace operation or to stabilize a country entangled in an internal conflict in the context of a power sharing agreement among key protagonists i e a stability operation In each of these cases at least one of the parties to the agreement was a criminalized power structure that was a leading spoiler The final chapter identifies strategies that are most effective for each type of CPS including the ways and means or tools required for effective conflict transformation A companion volume Combating Criminalized Power

Structures A Toolkit provides practitioners with the means of coping with the challenges posed by CPS
