Children and Adults, Third Edition Kathryn Kohnert, Kerry Danahy Ebert, Giang Thuy Pham, 2020-08-26 Language Disorders in Bilingual Children and Adults Third Edition provides speech language pathologists advanced students in communication disorders programs and clinical language researchers with information needed to formulate and respond to questions related to effective service delivery to bilingual children and adults with suspected or confirmed language disorders The bilinguals of interest represent varying levels of first and second language proficiency across the lifespan That is bilingualism is not determined here by proficiency in each language but rather by the individual's experience or need for two languages In separate chapters the book synthesizes the literature on bilingual children and adults with typical and atypical language skills These chapters give the reader a deep understanding of the multiple factors that affect language development and disorders in those who rely on two languages for meaningful interactions Chapters on assessment and intervention issues and methods are then presented for each population For children the text focuses on developmental

language disorder but also discusses secondary language disorders such as autism spectrum disorder in bilingual populations. For adults the focus is on aphasia with additional discussion of dementia, traumatic brain injury, and right hemisphere disorder. Although child and adult typical and atypical populations are presented separately, all are considered within a unifying Dynamic Interactive Processing perspective and within a new Means/Opportunities/Motives framework for understanding language disorders in bilinguals. This broad theoretical framework emphasizes interactions between social, cognitive, and communicative systems to form the basis for very practical implications related to assessment and intervention. This third edition has been completely updated to reflect the current research on bilingual populations and the best practices for working with them. Studies at the intersection of bilingualism and language disorders have expanded to include additional disorders and new language combinations. The authors synthesize the current literature and translate it for clinical use. New to the Third Edition: Coauthors Kerry Danahy Ebert PhD CCC SLP and Giang Thuy Pham PhD CCC SLP. Updated literature review and references to reflect new research on bilingualism, cultural competence, cognitive advantages, and clinical practice with linguistically diverse populations. Case studies on assessment with bilingual children and adults. Additional tables and figures summarizing key information. Available evidence on additional child and adult language disorders in bilinguals. Updated extension activities and resource supplement.

Foundations in Neonatal and Pediatric Respiratory Care

Teresa A. Volsko, Sherry Barnhart, 2022-05-25. Advances in respiratory care over the past years have made a significant impact on the health and well-being of infants, children, and their families. Designed to be the primary text for the Neonatal and Pediatric course as part of the respiratory care core curriculum, *Foundations in Neonatal and Pediatric Respiratory Care* provides students and practitioners alike with a comprehensive yet reader-friendly resource. In this second edition, the authors recognize the importance of sharing the essential elements of care that are unique to children as they grow and develop and provide the clinician with the knowledge needed to effectively communicate recommendations for therapeutic intervention or changes to the plan of care. This text has contributions in each chapter by national experts who are actively practicing in their subject areas, providing the most relevant evidence-based material and content that has a significant and practical application to current practice. Every new print copy includes Navigate Premier Access that unlocks an interactive eBook, the Heart/Lungs Module, an Equipment Simulator, Anatomy/Physiology Module, additional case studies, test prep, and additional flashcards. NEW: Each chapter will feature five review questions per chapter. NEW: Chapter on non-invasive ventilation. Each chapter begins with a list of objectives in the NBRC testing format. Innovative and unique illustrations found throughout the text demonstrate how to properly provide care and use equipment in this specialty area. Following the NBRC matrix, this text is an exceptional reference for credentialed practitioners who are interested in taking the Neonatal/Pediatric Special Credentialing exam and includes a comprehensive practice exam of 140 new items. Case studies or critical thinking questions conclude every chapter, allowing readers to apply what they have learned. A full suite of flashcards are included in
