

The World's Indigenous Peoples

1 'Indigenous Peoples' has no official definition by the UN due to diverse identities and histories. Instead, organizations utilize a modern understanding of traits including self-identification, historical continuity with pre-settler societies, distinct systems and culture, and a commitment to preserve heritage and environments.

Here's a look at the latest available population distribution of the estimated 470 million Indigenous Peoples around the world.

While Indigenous Peoples comprise 8% of the world's population, their lands and territories constitute at least 25% of the global land surface including unique ecosystems and vital biodiversity.

Indigenous Population by Country/Territory

Besides the State of Finland, Sweden and Norway, many of Europe's Indigenous Peoples did not have recent data available, including the Romany and Crimean Tatars.

 Towards Negotiated Co-management of Natural Resources in Africa L. B. Venema,1999 Within the field of management of natural resources this book focuses on the various approaches of policy formulation and implementation The question central to this book is how to co operate with people the various categories of residents as well as non residents in the rural areas in a top down a participatory or a contractual co management way On the basis of a comparative analysis of 12 case studies in the book these three approaches are thoroughly discussed and their internal and external constraints examined The book starts with an editorial chapter discussing the recent administrative and political developments in Africa as well as the new opportunities which they offer for policies in the field of environment and development The question is brought up whether the recent processes of decentralization democratization and empowerment of local organizations have indeed created new opportunities or that they have only superficially changed the political culture of the countries concerned In the concluding chapter of the book the approaches are contrasted to each other as logical models each with its own potentiality and limitations Conclusions are formulated why the top down approach must result in improvisation to escape from failure and why the participatory approach risks to end up into a mixed balance Special attention is given to the conditions and the prospects for the contractual or co management approach which has been introduced into Africa only recently Under certain conditions this approach seems rather promising
