NATØ: Narrative Architecture in Postmodern London Claire Jamieson, 2017-01-20 Chronicling the last radical architectural group of the twentieth century NAT Narrative Architecture

Today who emerged from the Architectural Association at the start of the 1980s this book explores the group's work which echoed a wider artistic and literary culture that drew on the specific political social and physical condition of 1980s London. It traces NAT's identification with a particular stream of post punk postmodern expression a celebration of the abject an aesthetic of entropy and a do it yourself provisionality. Contacts Paul Ardenne, 2006 Fifteen projects 1988-2009. **Beauty in Architecture** Nele De Raedt, Maarten Delbeke, 2025-09-18. Beauty in Architecture brings together the views of architects artists critics historians and philosophers to explore how beauty can again become an integral part of discussions about architecture. Despite its recent resurgence in the public debate about the built environment the notion of beauty remains problematic and contested in critical discourse about architecture. When the topic is addressed it is either treated with suspicion historicized or contextualised or substituted with other often equally problematic terms such as order legibility atmosphere or character. This collection brings together voices from theory scholarship and practice to show that a conversation about beauty in architecture is necessary not only because the general public speaks easily and frequently about beauty in architecture but also because much can be gained from taking it seriously. Bringing together a diverse range of perspectives the essays reflect on the themes categories and concepts that should be part of such a conversation and show how talking about beauty engages important reflections on its ontology and what it involves values communities collectives and shared histories environment identity and political or legal mechanisms and institutions. A must read for designers and theorists alike this volume allows readers to discover new strategies and concepts to foster the discussion of beauty in architecture.

Brussels Housing Gérald Ledent, Alessandro

Porotto, Kristiaan Borret, 2025-02-17 Modern urban terraced houses or row houses emerged in Europe from the 17th century onwards. Usually two to three storeys high and with a garden at the back, they formed the traditional urban block. In Brussels, this bourgeois form of housing took on a particularly varied and inspiring form, including the well-known Art Nouveau residences, which form the DNA of the city to this day. This publication analyses 100 selected examples illustrating the emergence of the terraced house and its further development in other forms of housing. The result is a broad panorama and a history of the architecture and development of the city of Brussels with its particularly heterogeneous cityscape. This expanded edition comprises a new chapter by Kristiaan Borret, the city's former bouwmeester. 13 new case studies were added and the content was updated. A project index facilitates quick navigation. With a photo essay by the well-known Belgian photographer Maxime Delvaux. All plans have been drawn in standard scales especially for the publication. An atlas of exemplary historical and contemporary housing typologies. Substantially expanded edition of the successful typological manual. **Architecture**
