The Oxford History of Protestant Dissenting Traditions, Volume IV Jehu J. Hanciles, 2019-03-07 The five volume Oxford History of Protestant Dissenting Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and royal supremacy but then follows those traditions as they spread beyond England and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society

attitudes toward Scripture and characteristic patterns of organization that also originated in earlier English Dissent but that have often defined a trajectory of influence independent ecclesiastical organizations Volume IV examines the globalization of dissenting traditions in the twentieth century During this period Protestant Dissent achieved not only its widest geographical reach but also the greatest genealogical distance from its point of origin Covering Africa Asia the Middle East America Europe Latin America and the Pacific this collection provides detailed examination of Protestant Dissent as a globalizing movement Contributors probe the radical shifts and complex reconstruction that took place as dissenting traditions encountered diverse cultures and took root in a multitude of contexts many of which were experiencing major historical change at the same time This authoritative overview unambiguously reveals that Dissent was transformed as it travelled
