Advances in

the Molecular Biology of Trypanosomatid Pathogens Gustavo Benaim,Alberto Enrique Paniz Mondolfi,Juan David Ramírez,Emilia Mia Sordillo,2021-12-01 *Global Health and Geographical Imaginaries* Clare Herrick,David Reubi,2017-03-16 To date geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health However the compulsion to do and understand global health emerges largely from contexts that geography has long engaged with urbanisation globalisation political economy risk vulnerability lifestyles geopolitics culture governance development and the environment Moreover global health brings with it an innate powerful and politicising spatial logic that is only now starting to emerge as an object of enquiry This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed critical global health studies Geographical perspectives this collection argues are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions Thus rather than rehearsing the frequent critique that global health is more a set of problems than a coherent disciplinary approach to ameliorating the health of all and redressing global bio inequalities this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself but in so doing brings forth a series of new conceptual methodological and empirical contributions to social scientific multidisciplinary scholarship Policing and Boundaries in a Violent Society Guy Lamb,2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service SAPS By means of a historical analysis of South Africa this book introduces a new concept police frontierism which illuminates the nature of the relationships between the police policing and boundaries and can potentially be used for future case study research Drawing on a wealth of research this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary Focusing on cases of high density police operations public order policing and the recent policing of the COVID 19 lockdown this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa This book will be of interest to scholars and students interested in policing in post colonial societies characterised by high levels of violence as well as police work and police militarization The South African Response to COVID-19 Pieter Fourie,Guy Lamb,2023-03-28 This book analyses the first two years of South Africa s response to the COVID 19 epidemic from its emergence in early 2020 Drawing on the perspectives of a range of public health experts economists and other social scientists and development practitioners this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness This book provides a

systemic analysis of not only the epidemiological progression of COVID 19 in South Africa but also the socio political factors that will be key in determining the future of the country as a whole including health system challenges socio economic disparities and inequalities and variable often contradictory and tardy policy responses Overall this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights economic recovery against viral vector control and science against ideology with lessons not just for South Africa but also for elsewhere on the African continent and beyond This book will be perfect for researchers and practitioners across Public Health Health Policy and Global Health as well as those with an interest in South African politics and development more generally The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
