Values Of Beauty Values Of Beauty:

Beauty Frederick Turner, Frederick W. Turner, 1991 In this groundbreaking interdisciplinary work Frederick Turner presents a new theory of aesthetics based on the argument that beauty is an objective reality in the universe He identifies the experience of beauty as a pancultural neurobiological phenomenon Drawing on recent work in a wide range of fields ritual and dramatic performance the oral tradition paleoanthropology and human evolution neurobiology cosmology and theoretic physics chaos theory and fractal mathematics the book describes evolution as a self organizing emergent process that generates increasingly advanced forms of self reflection and proposes that the experience of beauty is the recognition of this evolutionary process and the reward for participating in it The experience of aesthetic beauty Turner says is an adaptive function that drives evolution through sexual selection Those individuals most sensitive to beauty survived surface cultural changes excelled in mating rituals and were participants in the positive evolution of the species Turner shows how as a result neurotransmitters in the brain respond to certain inherited systems by which we appreciate beauty Turner also presents the implications for theories of art and literature that follow from his identification of the inherent genres of human aesthetic experience Forms of art cannot be arbitrary but must be rooted in our biological inheritance This calls into question theories about modern art and suggests that modernist culture turned its back on beauty in an attempt to repress and avoid the shame of humanness and our biological nature This book breaks radically with contemporary positions in psychology sociology philosophy and art and offers an alternative to present trends in literary and critical theory It should be of interest to a wide variety of readers including the artistic community critical theorists students of oral traditions philosophers and aestheticians

Beauty and Other Forms of Value Samuel Alexander, 1963

Uncertain Values Stefan Riedener, 2021-10-25 How ought you to evaluate your options if you're uncertain about what's fundamentally valuable A prominent response is Expected Value Maximisation EVM the view that under axiological uncertainty an option is better than another if and only if it has the greater expected value across axiologies But the expected value of an option depends on quantitative probability and value facts and in particular on value comparisons across axiologies We need to explain what it is for such facts to hold Also EVM is by no means self evident We need an argument to defend that it's true This book introduces an axiomatic approach to answer these worries It provides an explication of what EVM means by use of representation theorems intertheoretic comparisons can be understood in terms of facts about which options are better than which and mutatis mutandis for intratheoretic comparisons and axiological

probabilities And it provides a systematic argument to the effect that EVM is true the theory can be vindicated through simple axioms The result is a formally cogent and philosophically compelling extension of standard decision theory and original take on the problem of axiological or normative uncertainty Consumer Value Morris Holbrook,2002-03-11 As shoppers what factors influence our decision to purchase an object or service Why do we chose one product over another How do we attribute value as part of the shopping experience The theme of serving the customer and customer satisfaction is central to every formulation of the marketing concept yet few books attempt to define and analyse exactly what it is that consumers want In this provocative collection of essays Morris Holbrook brings together a team of the top US and European scholars to discuss an issue of great importance to the study of marketing and consumer behaviour This ground breaking interdisciplinary book provides an innovative framework for the study of consumer value which is used to critically examine the nature and type of value that consumers derive from the consumption experience efficiency excellence status esteem play aesthetics ethics spirituality Guaranteed to provoke debate and controversy this is a courageous individualistic and idiosyncratic book which should appeal to students of marketing consumer behaviour cultural studies and consumption studies **The Ethical Foundations of Economics** John J. Piderit,1993-03-01 Piderit explores the failures of mainstream economics and proposes an alternative grounded in natural law His assessment is grounded in the Christian higher law tradition which assumes that objective standards known to human reason should govern society and individuals This book demonstrates both the reasonableness of a distinguished ethical tradition and its capacity to address a wide range of ethical issues economic as well as personal and social Piderit emphasizes that natural law theory underlies the U S Constitution and informs Catholic Protestant and Jewish worship today Moral Values and the Idea of God W. R. Sorley,2013-12-19 First published in 1918 and originally delivered as the Gifford Lectures in the University of Aberdeen in 1914 and 1915 this book is concerned with the relation between the true foundation of ethics and the true knowledge of God Sorley explores the limits of morality and the problem of the divergence between the order of existence and the moral order as well as the question of freedom and the very idea of God This book will be of value to anyone with an interest in ethics or in the theistic grounding of morality **The Mystery of Values** Ludwig Grünberg,2021-11-08 This study of axiology explores the axiocentricity of being human Human beings dwell in the realm of value Values are not simply what persons have values in large part are what persons are The mystique of values is analyzed here in terms of their cultural phenomenological and ontological status The relationship between science and values is debated Values should not be submitted to reductionism Postmodernism raises new problems for the future of a philosophy of values Yet we may direct our hopes toward happiness universalism and humanism as inseparable from value life Value Education A. R. Mohapatra,Bijaya Mohapatra,2024-11-20 This book is intended to study Value Education from traditional philosophy to modern social philosophy from different aspects The attempts has been taken to clear the concept of Value Education from a realistic perspective Value Education in concerned

with total person of a being and becoming with moral awareness and character The study of Value Education can pave the way towards perfection with a mission to live by the values and virtues The subject matters of the book is for the enrichment of human life with innate knowledge and values **Husserl's Ethics and Practical Intentionality** Susi

Ferrarello,2015-12-17 Husserl's 20th century phenomenological project remains the cornerstone of modern European philosophy The place of ethics is of importance to the ongoing legacy and study of phenomenology itself Husserl's Ethics and Practical Intentionality constitutes one of the major new interventions in this burgeoning field of Husserl scholarship and offers an unrivaled perspective on the question of ethics in Husserl's philosophy through a focus on volumes not yet translated into English This book offers a refreshing perspective on stagnating ethical debates that pivot around conceptions of relativism and universalism shedding light on a phenomenological ethics beyond the common dichotomy *Nature, Value, Duty* Christopher J. Preston, Wayne Ouderkirk,2006-11-17 Gifford Lecturer and Templeton Prize winner Holmes Rolston III is widely known as the father of environmental ethics His writings range between natural philosophy and theology and include detailed presentations of an interlocking position that includes aesthetics value theory natural resource policy wilderness advocacy and sustainable development *Nature Value and Duty Life on Earth* with Holmes Rolston III is a collection of contemporary writings on the work of Holmes Rolston III The authors contributing to this volume are a mixture of senior scholars in environmental ethics and new voices in philosophy and in literature Together they provide an in depth evaluation of many of the topics discussed by Rolston They probe the strengths and weaknesses of his work and suggest valuable correctives Rolston himself in a detailed reply to each of his critics at the end of the volume reveals where some of these criticisms sting him the most and in the process provides one of the most detailed and articulate defenses of his position ever offered **Shaping the Normative Landscape** David Owens,2012-09-20

Shaping the Normative Landscape is an investigation of the value of obligations and of rights of forgiveness of consent and refusal of promise and request David Owens shows that these are all instruments by which we exercise control over our normative environment Philosophers from Hume to Scanlon have supposed that when we make promises and give our consent our real interest is in controlling or being able to anticipate what people will actually do and that our interest in rights and obligations is a by product of this more fundamental interest In fact we value for its own sake the ability to decide who is obliged to do what to determine when blame is appropriate to settle whether an act wrongs us Owens explores how we control the rights and obligations of ourselves and of those around us We do so by making friends and thereby creating the rights and obligations of friendship We do so by making promises and so binding ourselves to perform We do so by consenting to medical treatment and thereby giving the doctor the right to go ahead The normative character of our world matters to us on its own account To make sense of promise consent friendship and other related phenomena we must acknowledge that normative interests are amongst our fundamental interests We must also rethink the psychology of agency and the nature of social convention **Value Theory**

Deshun Li,2013-07-12 Humankind's progress has always been driven by two momentums the pursuit of truth and the creation of value But our understanding of value and our ability to reflect on its complexity has long lagged behind our constant search for truth This has in turn limited our grasp of the essence of truth This book takes philosophical contemplations on value to a new level while also explicating some contemporary Chinese styles of philosophical thought Over the past 25 years this book has been having an increasing impact on Chinese readers and researchers and it also provides a good platform for international dialogue on several key issues of philosophical studies **Face Values** Navaz Batliwalla,2021-08-31 Face Values is packed with insights and inspiration on skincare make up haircare fragrance and wellness Delve inside the bathroom cabinets and make up bags of fashion designers beauty writers make up artists perfumers and eco entrepreneurs and discover their skincare secrets beauty philosophies and essential daily rituals including the hero products they can't do without It also features a global directory of the best beauty resources Embracing modern values of understated style sustainability and anti perfectionism this book reveals the benefits of a positive and mindful approach to beauty wellness and self care *Beauty and Other Forms of Value* S.
