Van In Stromend Water:

, "This is our belief around here" Haryani Saptaningtyas, 2021-11-30 This study analyzes ritual and domestic water use in a rural and an urban community in West Java Indonesia This is an area where water quantity and quality is a problem The focus is on people who live at the edge of Citarum River one of the most polluted rivers in the world Most people there are Muslim What is the relation between people's perceptions of pollution of Upper Citarum River and purification in Islamic teaching and their practices of water use It studies the perceptions of pollution and purification of Sundanese Muslims in West Java and the effects of those perceptions on practices of domestic and ritual water use Making a discourse analysis of local narratives the study argues that most people don't see pollution as problematic For them it has become normal They make a distinction between clean water in medical sense and pure water in ritual sense

Environmental History of the Rhine-Meuse Delta P.H. Nienhuis, 2008-05-06 This unique text presents the environmental history of the lowland delta of the rivers Rhine and Meuse It is an ecological story of evolving human environmental relations and how they cope with climate change and sea level rise The text offers a combination of in depth ecology and environmental history The synthesis presents a blueprint for future management and restoration from progressive reclamation of land in the past to adaptation of human needs to the forces of nature

Long-Throated Flumes and Broad-Crested Weirs M.G. Bos, 2012-12-06 In the context of water management structures that measure the flow rate in open channels are used for a variety of purposes i In hydrology they measure the discharge from catchments ii In irrigation they measure and control the distribution of water at canal bifurcations and at off take structures iii In sanitary engineering they measure the flow from urban areas and industries into the drainage system iv In both irrigation and drainage they can control the upstream water at a desired level This thesis represents an attempt to place such flow measurements on a solid foundation by explaining the theory of water flow through long throated flumes and their hydraulically related broad crested weirs On the basis of this theory and on practical experience these structures are recommended for use whenever the water surface in the channel at the measuring site can remain free The thesis concludes with a design procedure that will facilitate the application of these structures The idea to undertake research on discharge measurement structures was born upon my appointment as the first civil engineer with the International Institute for Land Reclamation and Improvement ILRI Because my recruiter Ir J M van Staveren then Director of ILRI had left the Institute before my arrival and because I was the first of my kind in an agricultural environment I looked for contact and found vii support from the late Prof Ir J Nugteren Prof Ir
