Variation And Reconstruction Current Issues In Linguistic Theory:

Variation and Reconstruction Thomas D. Cravens, 2006 The relation of language variation to reconstructed languages and to the methodology of reconstruction has long been neglected In this volume the relationship between language and variation is considered from a number of different angles looking at evidence from various language families In doing so the papers in this volume address a number of interconnected issues which are of current concern in comparative and historical linguistics

Shared Grammaticalization Martine Irma Robbeets, Hubert Cuyckens, 2013 This book offers fresh perspectives on shared grammaticalization a state whereby two or more languages have the source and the target of a grammaticalization process in common While contact induced grammaticalization has generated great interest in recent years far less attention has been paid to other factors that may give rise to shared grammaticalization This book intends to put this situation right by approaching shared grammaticalization from an integrated perspective including areal as well as genealogical and universal motivations and by searching for ways to distinguish between these factors The volume offers a wealth of empirical facts presented by internationally renowned specialists on the Transeurasian languages i e Japonic Koreanic Tungusic Mongolic and Turkic the languages in focus as well as on various other languages Shared Grammaticalization will appeal to scholars and advanced students concerned with linguistic reconstruction language contact and linguistic typology and to anyone interested in grammaticalization theory

Cognitive Linguistics and Lexical Change Natalya I. Stolova, 2015-03-27 This monograph offers the first in depth lexical and semantic analysis of motion verbs in their development from Latin to nine Romance languages Spanish French Italian Portuguese Romanian Catalan Occitan Sardinian and Raeto Romance demonstrating that the patterns of innovation and continuity attested in the data can be accounted for in cognitive linguistic terms At the same time the study illustrates how the insights gained from Latin and Romance historical data have profound implications for the cognitive approaches to language in particular for Leonard Talmy s motion framing typology and George Lakoff and Mark Johnson s conceptual metaphor theory The book should appeal to scholars interested in historical Romance linguistics cognitive linguistics and lexical change

Grammatical Reconstruction Don Daniels, 2020-03-09 There is still widespread disagreement among historical linguists about how or whether syntactic reconstruction can be done This book presents a comprehensive methodology for syntactic reconstruction grounded in a constructional understanding of language The author then uses that methodology to reconstruct Proto Sogeram the ancestor to ten languages in Papua New Guinea Chapters are devoted to phonology lexicon verbal morphosyntax nominal morphosyntax and syntactic constructions The work culminates in a sketch of Proto Sogeram grammar Based largely on the author s original fieldwork this is an innovative application of a novel methodology to new data and the most complete reconstruction of a Papuan proto language to date It will be of interest to scholars of language change language reconstruction typology and Papuan languages

Competing Models of Linguistic Change Ole Nedergaard Thomsen, 2006-10-25 The articles of this volume are centered around two

competing views on language change originally presented at the 2003 International Conference on Historical Linguistics in the two important plenary papers by Henning Andersen and William Croft The latter proposes an evolutionary model of language change within a domain neutral model of a generalized analysis of selection whereas Henning Andersen takes it that cultural phenomena could not possibly be handled i e observed described understood in the same way as natural phenomena These papers are models of succinct presentation of important theoretical framework The other papers present and discuss additional models of change e g invisible hand processes system internal models functional and cognitive models Most papers do not subscribe to the evolutionary model instead they focus on functional factors in the selection and propagation of variants as opposed to factors of code efficiency or on cognitive and pragmatic perspectives Several papers are inspired by the late Eugenio Coseriu and by Henning Andersen s theories on language change In particular the volume contains articles proposing interesting grammaticalization studies and extended models of grammaticalization The clear presentation of important and competing approaches to fundamental questions concerning language change will be of high interest for scholars and students working in the field of diachrony and typology The languages referred to in the papers include Cantonese the Chukotko Kamchatkan languages Danish English Eskimo languages German Norwegian Russian Spanish and Swedish

Romance Languages and Linguistic Theory 2004 Jenny Doetjes, Paz González, 2006-01-01 This volume brings together a selection of papers from the eighteenth Going Romance symposium held at Leiden University 9-11 December 2004 These papers cover a broad range of topics in phonology morphology syntax semantics historical linguistics and acquisition in a variety of Romance languages

Romance Languages and Linguistic Theory 2003 Twan Geerts, Ivo van Ginneken, Haike Jacobs, 2005-11-08 The annual Going Romance conference is the major European discussion forum for theoretically relevant research on Romance languages where current ideas about language in general and about Romance languages in particular are tested Starting with the thirteenth conference held in 1999 volumes with selected papers of the conferences are published under the title Romance Languages and Linguistic Theory This is the fifth such volume containing a selection of papers that have been presented at the seventeenth Going Romance conference held at the Radboud University Nijmegen The Netherlands from 20-22 November 2003 The three day program included a workshop on Diachronic Phonology The present volume contains a broad range of articles dealing not only with syntax and phonology but also with morphology semantics and acquisition of the Romance languages

Insubordination Nicholas Evans, Honoré Watanabe, 2016-11-18 The phenomenon of insubordination can be defined diachronically as the recruitment of main clause structures from subordinate structures or synchronically as the independent use of constructions exhibiting characteristics of subordinate clauses Long marginalised as uncomfortable exceptions insubordinated clause phenomena turn out to be surprisingly widespread and provide a vital empirical testing ground for various central theoretical issues in current linguistics the interplay of langue and parole the emergence of structure the question of where productive syntactic rules give way to

constructions the role of prosody in language change and the question of how far grammars are produced by isolated speakers as opposed to being collaboratively constructed in dialogue This volume the first book length treatment on the topic assembles studies of languages on all continents by scholars who bring a range of approaches to bear on the topic from historical linguistics to corpus studies to typology to conversational analysis

The Limits of Syntactic Variation Theresa Biberauer, 2008-09-17 Against the background of the past half century's typological and generative work on comparative syntax this volume brings together 16 papers considering what we have learned and may still be able to learn about the nature and extent of syntactic variation More specifically it offers a multi perspective critique of the Principles and Parameters approach to syntactic variation evaluating the merits and shortcomings of the pre Minimalist phase of this enterprise and considering and illustrating the possibilities opened up by recent empirical and theoretical advances Contributions focus on four central topics firstly the question of the locus of variation whether the attested variation may plausibly be understood in parametric terms and if so what form such parameters might take secondly the fate of one of the most prominent early parameters the Null Subject Parameter thirdly the matter of parametric clusters more generally and finally acquisition issues

Perspectives on Language Structure and Language Change Lars Heltoft, Iván Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15 This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure reanalysis actualization and indexicality Reanalysis is a part of ongoing everyday language use a process through which language is reproduced and changed Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society Indexicality covers the way in which parts of a linguistic system can point to other parts of the system both syntagmatically and paradigmatically The inclusion of indexicality leads to fine grained analysis in morphology word order and constructional syntax

Synchrony and Diachrony Anna Giacalone Ramat, Caterina Mauri, Piera Molinelli, 2013-05-31 The focus of this volume is on the relation between synchrony and diachrony It is examined in the light of the most recent theories of language change and linguistic variation What has traditionally been treated as a dichotomy is now seen rather in terms of a dynamic interface The contributions to this volume aim at exploring the most adequate tools to describe and understand the manifestations of this dynamic interface Thorough analyses are offered on hot topics of the current linguistic debate which are all involved in the analysis of the synchrony diachrony interface gradualness of change synchronic variation and gradience constructional approaches to grammaticalization the role of contact induced transfer in language change analogy Case studies are discussed from a variety of languages and dialects including English Welsh Latin Italian and Italian dialects Dutch Swedish German and German dialects Hungarian This volume is of great interest to a broad audience within linguistics including historical linguistics typology pragmatics and areal linguistics

Explanations in Sociosyntactic Variation Tanya Karoli Christensen, Torben Juel Jensen, 2022-01-20 What explains variation

in human language How are linguistic and social factors related How do we examine possible semantic differences between variants These questions and many more are explored in this volume which examines syntactic variables in a range of languages It brings together a team of internationally acclaimed authors to provide perspectives on how and why syntax varies between and within speakers focusing on explaining theoretical backgrounds and methods The analyses presented are based on a range of languages making it possible to address the questions from a cross linguistic perspective All chapters demonstrate rigorous quantitative analyses which expose the conditioning factors in language change as well as offering important insights into community and individual grammars It is essential reading for researchers and students with an interest in language variation and change and the theoretical framework and methods applied in the study of how and why syntax varies Lexical and Syntactical Constructions and the Construction of Meaning Marjolijn Verspoor, Kee Dong Lee, Eve Sweetser, 1997-06-26

The basic tenet of cognitive linguistics is that every linguistic expression is a construal relation The first section of this volume focuses on issues of such construal and presentation of information including figure ground relations image schematic structures and the role of syntactic constructions in information structure In sections two and three papers are presented on cross categorial polysemy between lexical and grammatical uses of a morpheme and between different grammatical senses and on the relationship between earlier lexical senses and later grammatical ones The final section of the volume brings together studies which shed further light on transitivity and argument structure The study of transitivity necessarily entails exploration of the relationship between syntactic constructions and the pragmatics and semantics conveyed by such constructions As a whole this collection of papers gives new evidence on the complexity and motivation of the mapping between linguistic form and function and offers a wealth of new directions for research on the construction of meaning at every level of the sentence Grammaticalization Paul J. Hopper, Elizabeth Closs

Traugott, 2003-07-31 This is a general introduction to grammaticalization the change whereby lexical terms and constructions come in certain linguistic contexts to serve grammatical functions and once grammaticalized continue to develop new grammatical functions The authors synthesize work from several areas of linguistics The second edition has been thoroughly revised with substantial updates on theoretical and methodological issues that have arisen in the decade since the first edition and includes a significantly expanded bibliography Particular attention is paid to recent debates over directionality in change and the role of grammaticalization in creolization **Grammaticalization and Language Change** Kristin

Davidse, Tine Breban, Lieselotte Brems, Tanja Mortelmans, 2012-10-30 This collective volume focuses on the latest developments in the study of grammaticalization and related processes of change such as degrammaticalization constructionalization lexicalization and petrification It addresses topical issues relating to the motivations sources defining features and outcomes of these changes New theoretical reflections are offered on the pragmatic motivation of grammaticalization paths process oriented differences between grammaticalization lexicalization and degrammaticalization

the question of gradualness and pace of grammaticalization and deictics as a distinct source of grammaticalization The articles describe various constructional and distributional changes affecting deictics determiners reflexives clitics nouns affixes adverbs and auxiliary verbs mainly in the Germanic and Romance languages The volume will be of great interest to historical linguists working on grammaticalization and related changes and to all linguists working on the interface between morphosyntax semantics pragmatics and discourse

The Bloomsbury Companion to Historical Linguistics Silvia Luraghi, Vit Bubenik, 2013-03-07 Originally published as the Continuum Companion to Historical Linguistics this book brings together a number of leading scholars who provide a combination of different approaches to current and new issues in historical linguistics while supplying an exhaustive and up to date coverage of sub fields traditionally regarded as central to historical linguistics research The editors aim to build a solid background for further discussion and to indicate directions for new research on relevant open questions The book includes coverage of key terms a list of resources and sections on history of research methodology phonology morphology grammatical categories syntax grammaticalization semantics etymology language contact sociolinguistics causes of language change It is a complete resource for researchers working on historical linguistics

Variation and Change in Morphology Franz Rainer, 2010 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session

Simultaneity in Signed Languages Myriam Vermeerbergen, Lorraine Leeson, Onno A. Crasborn, 2007-02-21 Signed language users can draw on a range of articulators when expressing linguistic messages including the hands torso eye gaze and mouth Sometimes these articulators work in tandem to produce one lexical item while in other instances they operate to convey different types of information simultaneously Over the past fifteen years there has been a growing interest in the issue of simultaneity in signed languages However this book is the first to offer a comprehensive treatment of this topic presenting a collection of papers dealing with different aspects of simultaneity in a range of related and unrelated signed languages in descriptive and cross linguistic treatments which are set in different theoretical frameworks This volume has relevance for those interested in sign linguistics in teaching and learning signed languages and is also highly recommended to anyone interested in the fundamental underpinnings of human language and the effects of signed versus spoken modality

Iconicity and Analogy in Language Change Janice Aski, Cinzia Russi, 2015-09-25 This book examines the alternation between accusative dative and dative accusative order in Old Florentine clitic clusters and its decline in favor of the latter Based on an exhaustive analysis of data collected from medieval Florentine and Tuscan texts we offer a novel analysis of the rise of the variable order the transition from one order to the other and the demise of the alternation that relies primarily on iconicity and analogy The book employs exophoric pragmatic iconicity a language external iconic relationship based on similarity between linguistic structure and the speaker writer s conceptualization of reality and endophoric iconicity a language internal iconic relationship where the iconic ground is construed between linguistic signs and structures Analogy is viewed as a productive process that generalizes patterns or

extends grammatical rules to formally similar structures and obtains the form of the analogical relationship between the masculine singular definite article and the third person singular accusative clitic which shared the same phonotactically constrained distribution patterns The data indicate that exophoric pragmatic iconicity exploits and maintains the alternation whereas endophoric iconicity and analogy conspire to end it Dialects Across Borders Markku Filppula, 2005-01-01

Nonstandard varieties of languages have recently become an object of new interest in scholarly research This is very much due to the advances in the methods used in data collection and analysis as well as the emergence of new language theoretical frameworks The articles in this volume stem from the 11th International Conference on Methods in Dialectology Methods XI August 2002 Joensuu The theme for this conference was Dialects across borders The selection of contributions included in this volume demonstrates how various kinds of borders exert major influence on linguistic behaviour all over the world The articles have been grouped according to whether they deal primarily with the linguistic outcomes of political and historical borders between states Part I various kinds of social and regional boundaries including borders in a metaphorical sense i e social barriers and mental or cognitive boundaries Part II and finally boundaries between languages Part III
