where students have to write a paper that may be related to sport or on the shelf of any lecturer teaching economics or public finance who has even a remote interest in sport The material is very accessible and useful in many different settings Ruud H Koning *Journal of National Economics and Statistics* Edward Elgar's brilliant market niche is identifying a topic in economics finding editors who know the area backwards and challenging them to assemble the best cross section of relevant articles either already published or newly commissioned Handbook on the Economics of Sport is Edward Elgar at its very best If you love economics you will find many fascinating insights here if you love sport but know little economics then this book is mostly accessible and will teach you a lot and if you are a sports mad economist then you will be in hog heaven Furthermore if like this reviewer you are broadly very sceptical about the reports consultants produce for governments on the supposed economic windfall from hosting a big event or subsidising a stadium then you will get a lot of good counter arguments in this volume Indeed there are several chapters on the above theme that I am sure I will be copying frequently to government officials in years to come The demand for sport is a fascinating subject and it is hard to pick out just one chapter from the second section Read them all they make a wonderful 65 page treat Part VI was a real feast a smorgasbord This is a magnificent piece of work and the 36 page index rounds it all off splendidly John Blundell *Economic Affairs* The book covers the most important areas of research of an emerging economic sub discipline spanning the past half a century It serves admirably the purpose of an introduction into the rich and growing area of reflection for all concerned the editors and authors of the Handbook have done a commendable job of accumulating sophisticated material for many economists managers politicians and self conscious fans who are sure to find excellent training ground for the whole heptathlon This book will be invaluable for advanced students investigating professional sport From the point of view of lawyers particularly those engaged with the relationship between law and sports governance the Handbook offers invaluable analysis of the economic issues that are alluded to in those debates but rarely examined in detail These insights will also prove useful for policy analysts and sports administrators for whom many sections should be considered mandatory reading Aleksander Sulejewicz *Journal of Contemporary European Research* Over 800 pages on the economics of sport What a feast What a treat The editors have done a wonderful job both in terms of breadth from David Beckham to child labour in Pakistan and depth tournaments and luxury taxes for example The 86 chapters are uniformly of a very high standard and illuminating And there are real gems in some of the contributions *British Journal on the Economics of Sport* This very interesting and comprehensive book achieves its objective namely to present an overview of research in sports economics at an introductory level The editors have produced an excellent reference book that belongs in all academic institutions libraries It provides extensive introduction to the growing body of literature in the rising field of economics of sport The book's relevant monographs should be read by institutions cities and countries prior to their committing major resources towards sports facilities or a sporting event James Angresano *Journal of Sports Economics* One could think of this book as the sports and economics counterpart to

Joy of Cooking because it will satisfy the needs of those with a keen interest in such subjects as the *Football and Migration* Richard Elliott, John Harris, 2014-09-19 Football is an incredibly powerful case study of globalization and an extremely useful lens through which to study and understand contemporary processes of international migration This is the first book to focus on the increasingly complex series of migratory processes that contour the contemporary game drawing on multi disciplinary approaches from sociology history geography and anthropology to explore migration in football in established emerging and transitional contexts The book examines shifting migration patterns over time and across space and analyses the sociological dynamics that drive and influence those patterns It presents in depth case studies of migration in elite men s football exploring the role of established leagues in Europe and South America as well as important emerging leagues on football s frontier in North America and Asia The final section of the book analyses the movement of groups who have rarely been the focus of migration research before including female professional players elite youth players amateur players and players families drawing on important new research in Ghana England Haiti and the Dominican Republic Few other sports have such a global reach and therefore few other sports are such an important location for cross cultural research and insight across the social sciences This book is engaging reading for any student or scholar with an interest in sport sociology human geography migration international labour flows globalization development or post colonial studies

African football migration Paul Darby, James Esson, Christian Ungruhe, 2022-01-25 The global success of football icons like Samuel Eto o Didier Drogba and Mohamed Salah has fuelled the migratory projects of countless young men across the African continent who dream of following literally and figuratively in their footsteps Drawing on over a decade of ethnographic research *African football migration* captures and chronicles the aspirations experiences and trajectories of those pursuing this highly prized form of transnational migration In doing so the book uncovers and traces the myriad actors networks and institutions that affect the ability of young people across the continent to realise social mobility through football s global production network The book sheds critical light on the barriers to social mobility erected by neoliberal capitalism and how these are negotiated by aspiring African footballers It also generates original interdisciplinary perspectives on the complex interplay between structural forces and human agency as young players navigate an industry rife with commercial speculation While a select few reach the elite levels of the game and build a successful career overseas the book vividly illustrates how for the vast majority trying their luck through football results in involuntary immobility in post colonial Africa These findings are complemented by rare empirical insights from transnational African migrants at the

margins of the global football industry and those navigating precarious retirement from careers as players African football migration offers essential coverage of why and how African youth and young men have become actors in the global football industry revealing the complex implications of transnational mobility both imagined and enacted **Advances in Sport Science: Latest Findings and New Scientific Proposals, volume II** Rubén Maneiro, Iyán Iván-Baragaño, José Luis Losada, Antonio Ardá Suárez, Mario Amatria, Gudberg K.
