1998 John Shook and Mike Rother of the University of Michigan wrote down Toyota's mapping methodology for the first time in *Learning to See*. This simple tool makes it possible for you to see through the clutter of a complex plant. You'll soon be able to identify all the processing steps along the path from raw materials to finished goods for each product and all of the information flows going back from the customer through the plant and upstream to suppliers. With this knowledge in hand it is much easier to envision a future state for each product family in which wasteful actions are eliminated and production can be pulled smoothly ahead by the customer. In plain language with detailed drawings this workbook explains everything you will need to create accurate current state and future state maps for each of your product families and then turn the current state into the future state rapidly and sustainably. In *Learning to See* you will find a foreword by Jim Womack and Dan Jones explaining the need for this tool. An introduction by Mike Rother and John Shook describing how they discovered the mapping tool in their study of Toyota. Guidance on identifying your product families. A detailed explanation on how to draw a current state map. A practice case permitting you to draw a current state map on your own with feedback from Mike and John in the appendix on how you did. A detailed explanation on how to draw a future state map. A second practice case permitting you

Value Stream Mapping Complete Self-Assessment Guide Gerardus Blokdyk, 2017-05. Is there a critical path to deliver Value stream mapping results? What would happen if Value stream mapping weren't done? What is Value stream mapping's impact on utilizing the best solutions? Is the scope of Value stream mapping defined? What are the business objectives to be achieved with Value stream mapping? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role. In EVERY company, organization, and department. Unless you are talking about a one-time single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, "What are we really trying to accomplish here?" And is there a different way to look at it? For more than twenty years, *The Art of Service's* Self Assessments empower people who can do just that, whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO, etc. They are the people who rule the future. They are people who watch the process as it happens and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals, and anyone interested in Value stream mapping assessment. Featuring 372 new and updated case-based questions organized into seven core areas of process design, this Self Assessment will help you identify areas in which Value stream mapping improvements can be made. In using the questions, you will be better able to diagnose Value stream mapping projects, initiatives, organizations, businesses, and processes using accepted diagnostic standards and practices, implement evidence-based best practice strategies aligned with overall goals, integrate recent advances in Value stream mapping and process design strategies into practice according to best practice guidelines.
