Taxing Profit in a Global Economy Michael P. Devereux, Alan J. Auerbach, Michael Keen, Paul Oosterhuis, Wolfgang Schön, John Vella, 2021-01-21 This book undertakes a fundamental review of the existing international system of taxing business profit It steps back from the current political debates on how to combat profit shifting and how taxing rights over the profits of the digitalized economy should be allocated Instead it starts from first principles to ask how we should evaluate a tax on business profit and whether there is any good rationale for such a tax in the first place It then goes on to evaluate the existing system and a number of alternatives that have been proposed It argues that the existing system is fundamentally flawed and that there is a need for radical reform The key conclusion from the analysis is that there would be significant gains from a reform that moved the system towards taxing profit in the country in which a business made its sales to third parties That conclusion informs two proposals that are put forward in detail and evaluated the Residual Profit Allocation by Income RPAI and the Destination based Cash Flow Tax DBCFT The book is authored by group of economists and lawyers the Oxford International Tax Group chaired by Michael P Devereux It draws insights from both economics and law including economic theory empirical evidence on the impact of taxes and an examination of practical issues of implementation to assess the existing system and to consider fundamental reforms This book will be useful to tax policy makers tax professionals academics and anyone interested in tax policy

Modernizing VATs in Africa Sijbren Cnossen, 2019-07-16 Most African countries are in dire need of more tax revenue In 28 out of 45 countries with a value added tax VAT total tax revenue as a percentage of GDP is around 15% or less falling short of what is necessary to finance basic human and economic development Far from being revenue raising instruments current African VATs are riddled with exemptions exclusions and zero rates on domestic goods and services that depress revenue are highly distortionary and greatly complicate the administration of VAT Modernizing VATs in Africa enables policymakers professionals and students to analyse African tax systems to ascertain how they can be modernized It explains the case for VAT base broadening over rate increasing arguing that exemptions and zero rates mainly accrue benefits for higher income groups Even more persuasively it demonstrates that the net result of fiscal systems can be equalizing if the revenue of broad based VATs is used to finance in kind transfers such as healthcare and education VAT modernization should be used to enable governments to finance development Modernizing VATs in Africa puts a compelling case forward for how and why this can be achieved

Insurance in European VAT Marta Papis-Almansa, 2016-11-30 Insurance constitutes a significant part of the financial services sector and is one of the foundations of modern economy and society In the design of tax laws however whether and how to tax insurance is a complex issue that has become particularly controversial in the area of value added tax VAT In the

European Union as in most of the world insurance is exempt from VAT but New Zealand and Australia do not follow this practice Given that New Zealand s simple comprehensive goods and services tax GST called the world s purest value added tax and its modified Australian version do not appear to suffer from the shortcomings in efficiency and effectiveness that plague European VAT a comparison of the two systems is in order This book is not only the first comparative in depth study of the treatment of insurance in the two systems but also the first comprehensive legal research devoted to the treatment of insurance in EU VAT published in English Among the underlying issues and topics treated by the two systems covered are the following who has a right to deduct input VAT in relation to supplies inherent in insurance arrangements and to what extent what constitutes a supply of insurance and consideration for such a supply what transactions fall within the scope of the VAT Directive s exemption for insurance and drawing a line between insurance and saving The analysis is grounded in a methodology in which concepts of European VAT are compared with concepts performing the same function in the Australian and New Zealand GST laws The author concludes with proposals for reform in EU VAT in the light of experience in these two major non EU countries Given that it has been proven that exemptions from VAT such as insurance cause a significant number of economic distortions and inefficiencies this study represents a major contribution to a topical debate in European VAT law It will be welcomed by taxation authorities interested policymakers practitioners and scholars not only in Europe but worldwide *American Book Publishing Record* ,2006 *Current Publications in Legal and Related Fields* ,2008 **The Rise of the Value-Added Tax** Kathryn James,2015-04-30 This book explores one of the most significant trends in the evolution of global tax systems by asking how within less than half a century the value added tax VAT has risen from relative obscurity to become one of the world s most dominant revenue instruments Despite its significance very little is known about why so many countries have adopted the VAT and in particular why different countries adopt the types of VAT that they do The popular mythology provides that the merits of the VAT have underpinned its global spread however this book contends that much scholarship confuses the question of why the VAT has risen to dominance with the issue of what makes a good VAT This book combines policy and legal analysis to propose a new way of understanding the rise of this important revenue instrument so as to better reflect the realities of the VATs that are actually implemented *Guide to International Legal Research* ,2009 *Directory of Japan Specialists and Japanese Studies Institutions in the United States and Canada: Japan specialists* ,2006 **Value Added Tax** Alan Schenk,Oliver Oldman,2022-10-17 This comparative examination of Value Added Taxes worldwide covers both theory and practice and is intended for an audience of students teachers researchers government officials and practitioners The authors are American law professors both teachers of courses on VAT and long time members of the ABA s Committee on Value Added Tax recently the Committee on Alternative Tax Systems The book begins with an extensive survey of VAT principles as enunciated during the second half of the twentieth century in official reports and by economists and other tax authorities Included are basic statistical data and an appendix delineating the global
