Value Waste Construction Fidelis Emuze:

Value and Waste in Lean Construction Fidelis A. Emuze, Tarcisio A. Saurin, 2015-11-06 Non value adding activities are otherwise known as waste in the lean construction lexicon. The aim of this collection is to build a common understanding of the role and contribution of value adding activities in achieving stipulated objectives and continuous improvement in construction projects and to contrast this with waste. Although the lean approach to construction projects has been widely covered, this is the first book that explicitly provides the link between value and waste in the Architecture Engineering and Construction AEC sector. This internationally researched collection seeks to create a paradigm shift which will shape work processes and future directions for how value is conceptualized and operationalized in both the project management and business aspects of construction. The readers will gain an understanding of the value adding paradigm in construction. How to make value supporting decisions. Waste identification and control in practice. With contributions from South Africa, Brazil, Norway, and the USA, the implications of this book are globally relevant. This is essential reading for all higher level students of construction management and economics and all professionals interested in value management. The Elgar Companion to the Built Environment and the Sustainable Development Goals Alex Opoku, 2024-02-12 Exploring the link between Sustainable Development Goals (SDGs) and the built environment, this erudite Companion provides a comprehensive overview and critical examination of key topics and complex research issues. Structured around the 5Ps of the SDGs: people, planet, prosperity, peace, and partnerships, the Companion suggests potential routes for the future direction of research within this multidisciplinary field of study. Climate Emergency - Managing, Building, and Delivering the Sustainable Development Goals Christopher Gorse, Lloyd Scott, Colin Booth, Mohammad Dastbaz, 2021-11-13 Through research and proven practice, the aim of the International Conference of Sustainable Ecological Engineering Design for Society (SEEDS) is to foster ideas on how to reduce negative impacts on the environment while providing for the health and well-being of society. The professions and fields of research required to ensure buildings meet user demands and provide healthy enclosures are many and diverse. The SEEDS conference addresses the interdependence of people, the built, and natural environments and recognizes the interdisciplinary and international themes necessary to assemble the knowledge required for positive change.

Sustainable Ecological Engineering Design Lloyd Scott, Mohammad Dastbaz, Christopher Gorse, 2020-06-29 Through research and proven practice, the aim of the International Conference of Sustainable Ecological Engineering Design for Society (SEEDS) is to foster ideas on how to reduce negative impacts on the environment while providing for the health and well-being of society.
