becoming a reality So the focus of this application oriented workshop was not so much on special academic topics but rather on the many practical aspects of this emerging new technology verification and validation and tool support and integration into the software life cycle By evaluating the state of the art with respect to industrial applications a discussion emerged among scientists practising engineers and members of regulatory and funding agencies about future needs and developments This discussion led to roadmaps with respect to the future of this field to tool support and potential application areas and promising market segments The contributions of the participants from industry as well as from the respective national security bureaus were particularly valuable and highly appreciated *Proceedings of the Third IBM Symposium on Mathematical Foundations of Computer Science*, 1978 *Bulletin mathématique de la Société des sciences mathématiques de la République socialiste de Roumanie* Societatea de Științe Matematică din Republica Socialistă România, 1985 *Proceedings of the ...
