Achieving the Sustainable Development Goals Simon Dalby, Susan Horton, Rianne Mahon, Diana Thomaz, 2019-04-11 This book draws on the expertise of faculty and colleagues at

the Balsillie School of International Affairs to both locate the Sustainable Development Goals (SDGs) as a contribution to the development of global government and to examine the political, institutional and financial challenges posed by the SDGs. The contributors are experts in global governance issues in a broad variety of fields ranging from health, food systems, social policy, migration and climate change. An introductory chapter sets out the broad context of the governance challenges involved and how individual chapters contribute to the analysis. The book begins by focusing on individual SDGs, examining briefly the background to the particular goal and evaluating the opportunities and challenges, particularly governance challenges in achieving the goal as well as discussing how this goal relates to other SDGs. The book goes on to address the broader issues of achieving the set of goals overall, examining the novel financing mechanisms required for an enterprise of this nature, the trade-offs involved, particularly between the urgent climate agenda and the social and economic goals, the institutional arrangements designed to enable the achievement of the goals and offering a critical perspective on the enterprise as a whole. *Achieving the Sustainable Development Goals* makes a distinctive contribution by covering a broad range of individual goals with contributions from experts on governance in the global climate, social and economic areas as well as providing assessments of the overall project, its financial feasibility, institutional requisites and its failures to tackle certain problems at the core. This book will be of great interest to scholars and students of international affairs, development studies and sustainable development as well as those engaged in policymaking nationally, internationally and those working in NGOs.
