Lithium-Ion Cells Yury Koshtyal ,Alexander Rummyantsev,2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications

Collision Course Hans Greimel,William Sposato,2021-06-22 Named one of the Best Business Books of 2021 by The Wall Street Journal In Japan it is called the Ghosn Shock the stunning arrest of Carlos Ghosn the jet setting CEO who saved Nissan and made it part of a global automotive empire Even more shocking was his daring escape from Japan packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center subsisting on rice gruel This is the saga of what led to the Ghosn

Shock and what was left in its wake Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business but the alliance's shiny image fronted an unsteady tense operation Culture clashes infighting among executives and engineers dueling corporate traditions and government maneuvering constantly threatened the venture Journalists Hans Greimel and William Sposato have followed the story up close with access to key players including Ghosn himself Veteran Tokyo based reporters they have witnessed the end of Japan's bubble economy and attempts at opening Japan Inc to the world They've seen the fraying of keiretsu Japan's traditional skein of business relationships and covered numerous corporate scandals of which the Ghosn Shock and Ghosn's subsequent escape stand above all Expertly reported Collision Course explores the complex suspicions around what and who was really responsible for Ghosn's ouster and why one of the top executives in the world would risk everything to escape the country It explains how economics history national interests cultural politics and hubris collided crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan This gripping unforgettable narrative full of fascinating characters serves as part cautionary tale part object lesson and part forewarning of the increasing complexity of doing global business in a nationalistic world
