Using Art for Social Transformation Eltje Bos, Ephrat Huss, 2022-12-16. Social arts are manifold and are initiated by multiple actors, spaces and direction from many directions and intentions but generally they aim to generate personal, familial, group, community or general social transformation which can maintain and enhance personal and community resilience, communication, negotiation and transitions as well as help with community building and rehabilitation, civic engagement, social inclusion and cohesion. Occurring via community empowerment, institutions, arts in health, inter ethnic conflict and frames of lobbying for social change, social art can transform and disrupt power relations and hegemonic narratives, destigmatize marginalized groups and humanize society through creating empathy for the other. This book provides a broad range of all of the above with multiple international examples of projects: photo voice, community theater, crafts groups for empowerment, creative place making, arts in institutions and arts based participatory research that is initiated by social practitioners and by artists and in collaboration between the two. The aim of this book is to help to illustrate, explore and demystify this interdisciplinary area of practice. With methods and theoretical orientation as the focus of each chapter, the book can be used both in academic settings and for training social and art practitioners as well as for social practitioners and artists in the field.
