China or Castro's Cuba appear at one time as both successful modernizing societies and the fulfillments of the boldest dreams of social justice. Why at the same time had these intellectuals so mercilessly judged and rejected their own Western liberal cultures? What impulses and beliefs prompted them to seek the realization of their ideals in distant poorly known lands? How do their journeys fit into long standing Western traditions of looking for new meaning? In the non Western world. These are some of the questions Paul Hollander sought to answer. In his massive study that covers much of our century. His success is attested by the fact that the phrase political pilgrim has become a part of intellectual discourse. Even in the post communist era the questions raised by this book remain relevant as many Western and especially American intellectuals seek to come to terms with a world which offers few models of secular fulfillment and has tarnished the reputation of political Utopias. His new and lengthy introduction updates the pilgrimages and examines current attempts to find substitutes for the emotional and political energy that used to be invested in them.

Redefining Pilgrimage Antón M. Pazos, 2016-04-22 Exploring what does and what does not constitute pilgrimage. *Redefining Pilgrimage* draws together a wide variety of disciplines including politics, anthropology, history, religion, and sociology. Leading contributors offer a broad range of case studies from a wide geographical area exploring new ways of approaching pilgrimage beyond the classical religious model. Re thinking the global phenomenon of pilgrimages in the 21st century, this book offers new perspectives to redefine pilgrimage.

Fighting the Last War Jeffrey M. Bale, Tamir Bar-On, 2024-01-24 The authors argue that the potential threat of a resurgence of fascism has been consistently exaggerated from 1945 until present day. That the ongoing lack of conceptual and definitional clarity with respect to terms like fascism, the radical right, the alt right, white supremacism, populism, racism, etc. has enabled ill informed or dishonest commentators to distort their meaning and abusively misapply those labels so as to delegitimize their political opponents and that the political and economic elites in charge of contemporary Western societies are now deliberately exaggerating and exploiting the threat posed by the domestic radical right in order to facilitate vilifying, harassing, deplatforming, censoring, canceling, and repressing disgruntled citizens no matter where they may lie along the political spectrum who openly criticize and vigorously oppose their agendas. The authors also advocate the use of well established scholarly methods for carrying out research on the right and provide precise definitions of various terms in order to facilitate the development of more accurate categorizations.

Culture and Civilization Irving Horowitz, 2018-02-06 Intellectual activity in the twentieth century took place largely under the banner of science and society. As the new millennium develops, it is becoming evident that science and society are not words that represent an unmitigated good nor for that matter do they exhaust what is new in the human condition. Past writing on the theme of culture has emphasized the growth and expansion of human capabilities. Recent use of the term civilization has placed great emphasis on the fall from grace of human beings. The use of both terms is rapidly changing. *Culture and Civilization* develops critical ideas intended to produce a positive intellectual climate, one that is prepared to confront threats and alert us to the opportunities of the twenty

first century It recognizes that the twenty first century presents people in all fields and of all faiths with shared challenges Culture and Civilization embraces the work of novelists journalists cultural figures technologists physical sciences historians and policy personnel who range beyond social science areas What they have in common is a view that civilization is under assault and that it represents a cause worth advancing and defending This publication does not embrace idiosyncratic visions of the clash of world civilizations or the end of Western civilization It does attempt to bring together immediate issues of the century that are substantially new and challenging We see that the essential polarity between democracy and autocracy has now taken on larger deeper dimensions in a different political economic and ecological terrain the central issue of our day is now civilization versus barbarism The character of democratic culture is central to the global equation and the systemic challenge This publication is a sober response to such a challenge

Health, Politics, and Revolution in Cuba Since

1898 Katherine Hirschfeld, 2017-07-05 Challenging many of the assumptions scholars have made about the Cuban Revolution's impact on healthcare this volume recounts one anthropologist's quest to discover the truth behind the complicated relationship between Cuba's revolution politics and healthcare system Katherine Hirschfeld became interested in Cuba in the mid 1990s after reading numerous laudatory books and articles describing the Castro regime's achievements in health and medicine Cuba's population health indicators seemed to be far superior to those of neighboring countries the national health costs low and medical care free at point of service to the entire people Historical records indicated that most of these positive health trends resulted from the changes instituted by Castro in 1959 Few of these authors however had actually spent time on the island Thus Hirschfeld found that academic writing on Cuba was often long on praise but short on empirical research about what exactly had changed in Cuban medicine since 1959 After much bureaucratic wrangling Hirschfeld managed to secure permission to conduct long term ethnographic research in Cuba where she lived with families from Havana and Santiago conducted clinic observations interviewed doctors and patients and was treated in a Cuban hospital during an epidemic of dengue fever The reality of the Cuban healthcare system turned out to be different than the scholarly ideal it was bureaucratized authoritarian and repressive and most people preferred to seek healthcare in the informal economy rather than endure the material shortages red tape and political surveillance of the public sector Written in the form of a first person narrative *Health Politics and Revolution in Cuba Since 1898* not only critically reevaluates Cuban healthcare after the 1959 revolution it includes chapters detailing Cuban health trends from the Spanish American War 1898 through the fall of Fulgencio Batista in 1959 and into the *Domicide* John Douglas Porteous, Sandra Eileen Smith, 2001 Douglas Porteous and Sandra Smith begin their analysis by examining just how important home is to human life and community Using a multitude of case studies of displacement they derive a theoretical framework that addresses the motives for methods and effects of domicile Two case studies of resettlement resulting from hydro electric power development in British Columbia are used to test this framework *Gangster States* K. Hirschfeld, 2015-02-09 The author draws on behavioral ecology to predict the

evolution of organized crime in unregulated systems of exchange and the further development of racketeer economies into unstable kleptocratic states The result is a new model that explains the expansion and contraction of political economic complexity in prehistoric and contemporary societies
