Textiles, Identity and Innovation: In Touch Gianni Montagna, Manuela Cristina Paulo Carvalho Figueiredo, 2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand study adapt and project them for the future It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them to their objectives and research D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge D_Tex proposes to promote discussion and knowledge in the

different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019 held June 19 21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers

The Formula for Success Aimee Rogstad Guidera, Nelson Smith, 1998 Individuals need the academic knowledge and skills that equip them to succeed in today's economy Almost 90 percent of new jobs require more than a high school level of literacy and math skills The knowledge content of work is increasing education is the key to maintaining a competitive edge and everyone in society benefits when student achievement in primary and secondary school increases The Third International Math and Science Study TIMSS compared performance in mathematics and science by a half million students worldwide at age ranges corresponding roughly to grades 4 8 and 12 including 33 000 Americans While U S students at the fourth grade level were near the first in the world in science and were above the international average in mathematics by the eighth grade U S performance had fallen to slightly above the international average in science and to below the international average in mathematics The message of TIMSS is that the U S still has a long way to go to ensure that all children achieve at world class levels
